

# make it minnie

by ashley wolf

## How to Use This Guide

- Print this guide on a standard sheet of paper
- Confirm the printed paper guide matches your ruler, this guarantees you get the proper ring size
- Cold or damp fingers are harder to measure
- The sizer should be snug for the most accurate sizing

### Confirm Printed Paper Size

*\*Make sure a ruler matches this size guide to verify your printout will give you accurate ring sizes*

## Ring Measurement Option #1

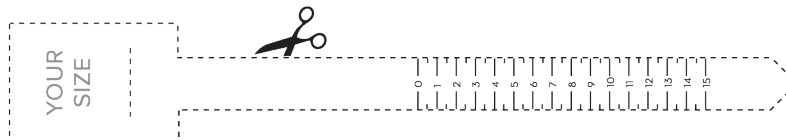

**Cut the sizer** (right) along the dotted lines.

**Don't forget** to cut a small slit below "your size"

**Put the pointed end** through the slit to make a large loop

**Slip the loop** on your finger and tighten it until the ring fits where you want it to sit

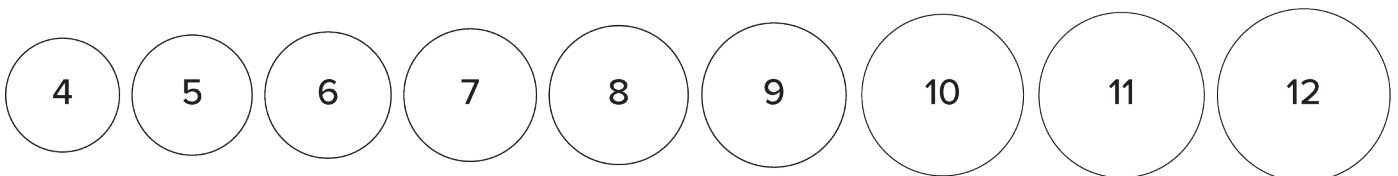

*\*Tips: You want your ring to be snug but fit over your knuckle with ease. Measure your finger at the end of the day, this is when it tends to be most swollen.*

## Ring Measurement Option #2

**Have a ring that you already love?**

Measure it against these circles to reveal its size.
