Your Telephone

Line Buttons

In this User Guide, fixed buttons on your telephone are indicated by a solid red background (**Spkr**). Buttons you label and program are represented by red letters on a white background (**CampOn**).

Line buttons are buttons used to make or receive inside or outside calls. Line buttons are labeled differently depending on how your system is configured. For example, you may have line buttons that provide you with direct access to an outside line, Pool buttons that provide you with access to an outside line after dialing an access code (usually a 9), Shared buttons that allow lines to be shared among co-workers, or Intercom buttons that provide you with access to internal dial tone.

In addition, line buttons may be labeled with an "R" (for Ring), "V" (for Voice), or "OO" (for Originate Only):

- Ring Buttons - Calls you make arrive as ringing calls.
- Voice Buttons - Calls you make arrive as voice-announced calls.
- Originate Only - Line button can only be used to make (not receive) calls.

In this guide, **LINE** represents a button that is labeled with an outside line number and **EXT** represents a button that may be labeled with an extension number or an Intercom number.

Your Telephone

Using the Speakerphone

To use the speakerphone, press **Spkr**.

To mute, press **Mute**. The Speakerphone/Mute LED flashes continuously, indicating that the call has been muted. To return to normal operation, press **Mute** again. The Speaker/Mute LED returns to steady.

Use the following guidelines to get the best performance from your speakerphone:

- Place your telephone at least one foot from any wall.
- Avoid placing your telephone in a partly enclosed area, such as underneath a low shelf over your desktop.
- Place your telephone as far as possible from interfering noises, such as your PC or a fan.
- Place your telephone on a hard, flat surface.
- The microphone is located on the right side of the telephone. Allow at least one inch of clearance.
- Your speakerphone performs better when the volume is set in the middle or lower range because you can more easily break into the conversation than when the speakerphone is set at maximum.

Line Button Lights

Steady red

*The line you are using or will use when you lift the handset or press **Spkr**.*

Steady green

The line is in use, or the feature programmed onto the line button is on.

Flashing green

An incoming call is ringing on this line button, or a call you transferred is returning on this line button.

Fast-flashing green

You have put a call on hold on this line button.

Slow-flashing green

Someone else has put a call on hold on this line button.

Your Telephone

Tones

Dial tone (steady tone)

You can make a call.

Busy (slow repeating tone)

The phone you are calling is busy.

Fast busy (fast repeating tone)

No lines are available.

Error (alternating high-low tones)

You dialed or used a feature incorrectly.

Confirmation (double break in dial tone followed by steady tone)

You used a feature correctly.

Callback (5 short beeps)

A line or pool you selected, or an extension you called, is busy and the system is putting your call into the callback queue.

Call Waiting (1 or 2 beeps)

You have an inside call (1 beep) or an outside call (2 beeps) waiting for you.

Rings

1 long ring

Inside call.

1 short ring and 1 long ring

Outside call.

1 long ring and 3 short rings

Outside call transferred to you or a call you transferred returning to you.

1 beep each minute

Call on hold reminder tone.

Call Handling

Make a Call

To make an outside call:

1: Press the **Line** button.

2: Do one of the following:

- Press **Spkr**.
- Lift the handset.
- Use the headset.

If required, dial the dial-out code, usually **9**.

To make an inside call:

1: Press **EXT**.

2: Do one of the following:

- Press **Spkr**.
- Lift the handset.
- Use the headset.

3: Dial the extension.

Answer a Call

To answer an outside or inside call, do one of the following:

- Press **Spkr**.
- Lift the handset.
- Use the headset.

To enable Hands-Free Answer on Intercom:

Press a programmed **HFAI** button, which allows you to respond to voice-sigaled (not ringing) intercom calls without having to lift the handset or press any buttons.

Call Handling

Transfer a Call

To transfer a call using the dialpad:

1: Press **Trnsfr**.

The system puts the call on hold and selects an **EXT** button.

2: Dial the extension or outside number.

To cancel or return to the call on hold, press the button next to the flashing *** Green Light**.

3: Announce the call (optional).

4: Hang up.

To transfer a call using one-touch manual transfer:

1: Press **Trnsfr**.

2: Press the programmed **AutoDial** button.

3: Announce the call (optional).

4: Hang up.

To transfer a call using one-touch auto transfers, if available:

Press the programmed **AutoDial** button.

Check with your System Manager to see if you have one-touch manual transfer or one-touch auto transfer.

Transfer a Call to a Voice Mailbox

To transfer a call to a voice mailbox:

1: Do one of the following:

- Press the programmed **Feature** button, and press **5 6**.
- Press the programmed **Direct Voice Mail** button (see "Direct Voice Mail" under "Covering Calls Features").
- Select Direct Voice Mail from the display (DicVM or Direct VM).

You cannot select features from the 4406D+ display.

2: Dial the extension number.

3: Hang up.

Call Handling

Place a Call on Hold

To place a call on hold:

- 1: Press the **Hold** button.
- 2: To retrieve the call (or conference) on hold, press the line button next to the fast-flashing **Green Light** (a call you put on hold) or the slow-flashing **Green Light** (a call put on hold at another extension).

When a call is on hold, the telephone beeps once each minute and **Call on Hold** appears on the display.

Make a Conference Call

While connected to the first party:

- 1: Press **Conf**.

The system puts the call on hold and selects an **EXT** button.

- 2: Connect with the next party.

You can connect to the next party by:

- Dialing an outside telephone number or an extension.
- Retrieving a call on hold.
- Answering an incoming call.

- 3: Press **Conf** again. Calls are now conferenced.

Repeat Steps 1–3 to add up to a total of 2 outside and 2 inside (not including yours) parties.

To drop a participant:

- 1: Press the programmed **Drop** button.

The 4400-Series telephones do not have a fixed Drop button; you must program a Drop button onto a button.

- 2: Press the line button of the party that you want to drop.

To put the conference on hold:

Press **Hold**.

To return to the conference:

Press any line button used to connect a participant.

To end the conference:

Hang up.

Using Features

Use a Feature

To use a feature, do one of the following:

- Press **Feature** and then select the feature from the display (not for the 4406D+ telephone).
Press **▶** to move to the next screen of features.
Press **◀** to return to the previous screen of features.
- Press **Feature** and then dial the feature code.
- Press the line button programmed with the feature.

Program a Feature Button

To program a **Feature button:**

- 1: Label a button as "Feature."
- 2: Press **EXT**.
- 3: Lift the handset.
- 4: Enter programming mode by pressing **# 0 0**.
- 5: Press the button you labeled.
- 6: Press *** 2 0**.
- 7: Exit programming mode by pressing **# * 0 0**.

Program a Feature onto a Button

To program features, extensions, and phone numbers:

- 1: Label the button.
- 2: Press **EXT**.
- 3: Lift the handset.
- 4: Press **# 0 0**.
- 5: Press the button you labeled.
- 6: Dial the appropriate programming code (see the following pages). Dial any additional numbers (such as extensions) if needed.
- 7: To program another button, repeat steps 1, 5, and 6; or exit by pressing **# * 0 0**.

Using Features

Special Characters

Features that dial numbers automatically may need special characters to allow for correct dialing or system response.

- Hold** Inserts 1–5 second **pause** in the dial sequence. Consecutive pauses are allowed. P appears on the display.
- Conf** Sends switchhook **flash**. Must be first entry in sequence. F appears on the display.
- # #** Used to signal **end of dialing** sequence for Auto Dial buttons or to separate grouped digits. The ## appears on the display.
- Trnsfr Stop**. Halts dialing sequence to allow for system response. (Requires manual restart.)

Headsets

Headsets for 4400-Series telephones allow one-touch operation, hands-free. The headset plugs into the headset jack. Two buttons are used for headset operation:

- **Headset Status**. Press **Headset Status** to switch between headset and handset operation.
To program: **EXT** + lift handset + **# 0 0** + **Headset Status** + *** 7 8 2** + **# * 0 0**.
- **Headset Hangup**. Press **Headset /Hangup** to disconnect a call. The Headset/Hangup button is programmed by your System Manager.

Programming and Feature Codes

Call Handling Features

Call Waiting

When Call Waiting is turned on at an extension and you are already on a call, you hear one tone for inside calls or two tones for outside calls when a second call arrives at that extension.

To turn on Call Waiting at your extension: lift the handset and press * 1 1 .

To turn off Call Waiting at your extension: lift the handset and press * * 1 1 .

To pick up a Call Waiting call: hang up and the waiting call rings, or press **Feature** (or #) + 8 7 .

Camp-On

Camp-On allows you to complete a transfer to a busy extension. The call is put on hold until the extension can receive a call; then it rings automatically and you hear a priority ring (1 long ring and 3 short rings).

To use with the feature code:

Feature (or #) + 5 7 .

To program onto a button:

EXT + lift handset + # 0 0
+ **Camp-On** + * 5 7 +
* 0 0 .

Drop

You must program a Drop button onto a button. Use **Drop** to drop a participant from a conference call.

The display shows 4400-Drop.

To program a Drop button: **EXT** + lift handset + # 0 0 +
Drop + * 7 8 7 + # * 0 0 .

HFAI

To use Hands-Free Answer Intercom (HFAI), you must program an HFAI button onto a button. When you press **HFAI**, you can talk to a person who calls you on an intercom call without lifting the receiver.

To program an HFAI button: **EXT** + lift handset + **HFAI** +
0 0 + * 7 7 9 + # * 0 0 .

Programming and Feature Codes

Call Handling Features (continued)

Paging

There are two types of paging:

■ **Group**, where you can broadcast an announcement through the speakerphones of telephones on extensions that are placed into paging groups.

■ **Loudspeaker**, where you can broadcast an announcement over a loudspeaker connected to the system.

Group Paging

To broadcast an announcement to a paging group, lift the handset and dial the extension of the paging group. You can also program a button with a paging group extension by using the Auto Dial feature (see "Auto Dial" under "Dialing Features").

Loudspeaker Paging

Pages over a loudspeaker paging system are heard everywhere in the building or only in a particular area, depending on whether or not the loudspeaker system is a multizone paging system.

To broadcast an announcement over a loudspeaker, press the button labeled for "Loudspeaker Paging." If you do not have this button on your telephone, see your System Manager.

Park

Park places a call on hold at your extension so that it can be picked up from any extension in the system. You pick up a parked call by using the Pickup feature.

To use without programming a Park button:

1. *While on the call, press **Trnsfr**.*
2. *Dial your own extension.*
You hear a busy tone.
3. *Press **Trnsfr**.*

To program onto a button:

EXT + lift handset + **# 0 0**
+ **Park** + *** 8 6** +
* 0 0.

Programming and Feature Codes

Call Handling Features (continued)

Pickup

Pickup allows you to answer calls that are ringing, parked, or on hold anywhere in the system. There are two types of Pickup: Individual and Group. Use Individual Pickup to pick up a call for one specific extension. Use Group Pickup to answer calls ringing at extensions in your Pickup group.

Individual Pickup

There are three types of Individual Pickup: General, Extension, and Line. Use Extension to pick up a parked call.

General

To use with a programmed General Pickup button:

Pickup + ext. number (or line number).

To program onto a button:

EXT + lift handset + **# 0 0**
+ **Pickup** + *** 9** +
* 0 0.

Extension

To use with the feature code:

Feature (or **#**) + **9** + ext. number.

To program onto a button:

EXT + lift handset + **# 0 0**
+ **Pickup** + *** 9** + ext.
number + **# * 0 0**.

Line

To use with the feature code:

Feature (or **#**) + **9** + line number.

To program onto a button:

EXT + lift handset + **# 0 0**
+ **Pickup** + *** 9** + line
number + **# * 0 0**.

Group Pickup

To use with the feature code:

Feature (or **#**) + **8 8**.

To program onto a button:

EXT + lift handset + **# 0 0**
+ **Pickup** + *** 8 8** +
* 0 0.

Programming and Feature Codes

Covering Calls Features

Coverage

Coverage allows a call ringing at one extension (a sender) to ring at another extension (a receiver) at the same time, and to be answered at either extension.

There are two types of Coverage: Individual and Group. Individual Coverage can be Primary or Secondary Coverage. With Primary and Secondary Coverage, a call not answered at a sender's extension rings first at the Primary Coverage extension and later, after a ring delay interval, at the Secondary Coverage extension. See your System Manager for details.

Coverage Off

Coverage Off turns off all coverage, both inside and outside calls.

To program a Coverage Off button: **EXT** + lift handset + **# 0 0** + **Coverage Off** + * **4 9** + **# * 0 0**.

Coverage Inside Off/On

Coverage Inside Off/On prevents or allows coverage of inside calls. If you activate Coverage Inside Off, you can cover only outside calls. If you activate Coverage Inside On, you can cover both outside and inside calls.

To activate Coverage Inside Off: **EXT** + lift handset + **# 0 0** + **EXT** + * * **4 8** + **# * 0 0**.

To activate Coverage Inside On: **EXT** + lift handset + **# 0 0** + **EXT** + * **4 8** + **# * 0 0**.

Coverage VMS Off

Coverage VMS Off prevents outside calls from being sent to the voice messaging system.

This feature should be programmed on a button with LEDs.

To program a Coverage VMS OFF button: **EXT** + lift handset + **# 0 0** + **Coverage VMS Off** + * **4 6** + **# * 0 0**.

Programming and Feature Codes

Covering Calls Features (continued)

Direct Voice Mail

Direct Voice Mail allows you to place or transfer a call directly to another person's voice mail without ringing that person's telephone.

To use with the feature code:

Feature (or **#**) + **5 6** +
extension number (or
Auto Dial).

To program onto a button:

EXT + lift handset + **# 0 0**
+ **DVM** + *** 5 6** +
* 0 0.

Follow Me

Use Follow Me to have calls arriving at your extension sent to another extension where you are working. Activate Follow Me from the extension where you want to receive calls.

To activate Follow me: **Feature** (or **#**) + **3 4** + the sending extension's number.

To cancel Follow Me: see "Cancelling Follow Me and Forward" under Forward.

Forward

Use Forward to send calls arriving at your extension to another number. This number can be an inside extension, an extension on another system in a private network, or an outside number. Turn on forward from your extension.

To send calls to an extension: **Feature** (or **#**) + **3 3** + the extension number.

To send calls to an outside number: **Feature** (or **#**) + **3 3** + code (usually 9) + the outside number + **# #**.

Check with your System Manager to see if you are allowed to send calls to outside numbers.

Programming and Feature Codes

Covering Calls Features (continued)

Canceling Follow Me and Forward

You can cancel Follow Me and Forward from the sending or receiving telephone.

If you forward your calls to an outside number, you can cancel from your extension or from a remote location by using Remote Access. Check with your System Manager.

To cancel from the sending telephone: **Feature** (or **#**) + **3 3** + your extension.

To cancel from the receiving telephone:

■ *To cancel Follow Me or Forward calls from one extension:*

Feature (or **#**) + * **3 4** + sending extension number.

■ *To cancel Follow Me or Forward calls from all extensions:*

Feature (or **#**) + * **3 4 ***.

Dialing Features

Account Code Entry

Use Account Code Entry to enter account codes for outside calls, both incoming and outgoing. These codes are used for billing, cost-accounting, or project tracking.

To use with the feature code:

Feature (or **#**) + **8 2** + code + **#**.

To program onto a button:

EXT + lift handset + **# 0 0**
+ **ACE** + * **8 2** +
* 0 0.

Authorization Code

The Authorization Code feature allows you to pick up someone else's telephone, enter your authorization code, and complete a call with the restrictions that apply to your own telephone.

To use with the feature code:

Feature (or **#**) + **8 0** + code + **#**.

To program onto a button:

EXT + lift handset + **# 0 0**
+ **Auth Code** + * **8 0** +
* 0 0.

Programming and Feature Codes

Dialing Features (continued)

Auto Dial

Use Auto Dial buttons for one-touch dialing of frequently called telephone numbers. You can program two types of Auto Dial buttons: Inside and Outside. On the 4406D+ telephone, use Personal Speed Dial instead of Auto Dial buttons.

To program an Inside Auto Dial button: **EXT** + lift handset + **# 0 0** + **AutoDial** + *** 2 2** + the extension number.

To program an Outside Auto Dial button: **EXT** + lift handset + **# 0 0** + **AutoDial** + *** 2 1** + the number.

Saved Number Dial

Saved Number Dial allows you to save a dialed number and to call it again without manually redialing.

To program a Saved Number Dial button: **EXT** + lift handset + **# 0 0** + **Save #** + *** 8 5** + **# * 0 0**.

Directory and Speed Dialing Features

Directory

The Directory feature is a built-in, interactive telephone book that stores listings of names and telephone or extension numbers. If you have a 4412D+, 4424D+, or 4424LD+ telephone, you can dial numbers by selecting listings from the display. There are three Directories on the system: Extension, Personal, and System. Your System Manager programs the Extension and System Directories.

Extension and System Directory

Use the Extension Directory and System Directory with 4412D+, 4424D+, and 4424LD+ telephones.

The Extension Directory and System Directory are created by the System Manager. Use the Extension Directory to dial inside numbers. The System Directory consists of three-digit System Speed Dial codes for commonly called numbers of outside contacts (such as clients and suppliers).

To use: Press **Menu** + Directory (Dir) + Ext Dir (or System Dir) + Select range, then press the button next to the listing to dial.

Directory and Speed Dialing Features (continued)

Personal Directory

If you have a 4424LD+ telephone, you can create your own personalized list of names.

To add listings:

Menu + Directory + Personal Dir + Enter New + Type up to an 11-character name (Select A-F from the display and letters G-Z are shown under the faceplate of your telephone) + Enter + Enter the number using the dialpad + Enter + Respond to the number display prompt + Enter + **Exit**.

To change personal directory listings:

Menu + Directory + Personal Dir + Edit Dir + Choose item to be changed (Replace Name changes name, Replace Num changes number, Replace Tag displays or conceals number on the display) + Select entry to be changed + Enter new information + Enter + **Exit**.

To delete listings:

Menu + Directory + Personal Dir + Put on Home + Select range of + Select entry to be deleted + Select Delete to delete entry (Cancel exits without change) + **Exit**.

To assign listings to your Home screen:

Menu + Directory + Personal Dir + Put on Home + Select range of letters + Select entry to display in the directory + Select Home screen location + Select Continue for another entry + **Exit**.

To dial listing on Home screen:

Directory + Press the button next to the listing to dial.

To dial listing not on Home screen:

From the Home screen: **Menu** + Next Page twice + Select letter range + Press appropriate line button + Press button next to the listing to dial.

Directory and Speed Dialing Features (continued)

Personal Speed Dial

Use Personal Speed Dial on a 4406D+ telephone to program up to 24 numbers that can be dialed by using a two-digit code.

To prevent the loss of programming on your buttons, do not use Personal Speed Dial on a 4412D+, 4424D+, or 4424LD+ telephone.

To program your Personal Speed Dial numbers, make a list of your telephone numbers/extensions numbered 1 to 24, then:

EXT + lift handset + **# 0 0** + **#** + list number (01–24) + *** 2 1** + the number + **# * 0 0**.

To use Personal Speed Dial:

- 1: Press **EXT**.
- 2: Press **Feature**.
- 3: Dial the two-digit code (01–24).

Programming and Feature Codes

Language Features

Language Choice

You can change the language on your display screen to English, Canadian French, or Latin American Spanish.

To change the language for your display:

- 1: Press the programmed **Feature** button.
- 2: Dial one of the following:
 - For English: **7 9 0**.
 - For Canadian French: **7 9 1**.
 - For Latin American Spanish: **7 9 2**.

Privacy Functions

Do Not Disturb

Do Not Disturb prevents calls from ringing and prevents paging over a speakerphone. You must program a Do Not Disturb button to use this feature.

This feature should be programmed on a button with LEDs.

To program a Do Not Disturb button:

EXT + lift handset + **# 0 0** + **DND** + *** 4 7** + **# * 0 0**.

Privacy

Privacy prevents other people from joining calls on shared line buttons. Privacy also prevents Barge-In from being used to join a call.

To turn Privacy on: **Feature** (or **#**) + **3 1**.

To turn Privacy off: **Feature** (or **#**) + *** 3 1**.

This feature should be programmed on a button with LEDs.

To program a Privacy button:

EXT + lift handset + **# 0 0** + **Privacy** + *** 3 1** + **# * 0 0**.

Programming and Feature Codes

Programming Functions

Inspect

Inspect allows you to see information about an incoming call that is ringing, alerting, or on hold or to see what is programmed on a button. To use the Inspect feature, you press the programmed **Inspect** button and then the line button for the incoming call.

To program an Inspect button: **EXT** + lift handset + **# 0 0 0** + **Inspect** + *** 7 7 8** + **# * 0 0**.

Ringing Options

Personalized Ring

By using the Personalized Ringing options, you can select one of eight different ringing patterns for your telephone, making it easier to distinguish its ring from those of other telephones.

To select a ring pattern for your telephone: **EXT** + lift handset + **# 0 0 0** + **EXT** + *** 3 2** + ring (**1 - 8**) + **# * 0 0**.

The last ring you hear is the ring you selected.

Scheduling Features

Posted Message

You can post a message to provide information to co-workers with display telephones—for example, to tell callers where you are when not answering the telephone or why you do not want to be disturbed. When you call a co-worker who has a message posted, the posted message is shown on your display (even if the call is answered).

Up to 20 different messages can be posted. 11–20 are for custom settings (see your System Manager). The factory-set messages are:

01	DO NOT DISTURB	06	IN A CONFERENCE
02	OUT TO LUNCH	07	WITH A CLIENT
03	AT HOME	08	WITH A CUSTOMER
04	OUT SICK	09	AWAY FROM DESK
05	IN A MEETING	10	OUT ALL DAY

Programming and Feature Codes

Scheduling Features

Posted Message (continued)

To use the Posted Message feature:

For 4412D+, 4424D+, or 4424LD+ telephones:

To post a message: **Menu** + Posted Msg (Post) + Select the message from the display.

To cancel a posted message: **Menu** + Posted Msg (Post) + Cancel + **Exit**.

For 4406D+ telephones:

To use posted messages, you must program a Posted Message button. Posted Message should be programmed on a button with LEDs.

To program a Posted Message button with LEDs (for 4406D+ telephones only): **EXT** + lift handset + **# 0 0** +

Posted Message + *** 7 5 1** + **# * 0 0**.

To post a message: **Posted Message** + dial the code for the message you want (01–20).

To cancel a posted message: **Posted Message** + dial **0 0**

Reminders

With Reminder service, you can arrange for the system to make reminder calls at preset times.

To set a reminder: **Feature** (or **#**) + **8 1** + time + **2** for A.M. or **7** for P.M.

Enter the time in four digits, for example, 0130.

To cancel a reminder: **Feature** (or **#**) + *** 8 1**.

You hear a priority ring (1 long ring and 3 short rings) to indicate a Reminder Call.

Displays

Display Appearances

Feature names appear differently on the multiline 4400-Series telephones, depending on whether the display is a 2-line display (4406D+, 4412D+, and 4424D+ telephones) or a 7-line display (4424LD+ telephone).

Feature	2-Line Display	7-Line Display

Displays

4406D+

4406D+ Display

The 4406D+ telephone's 2-line by 16-character display is used primarily for visual feedback. You cannot select features by using the 4406D+ display, but you can enter a feature code after pressing **Feature** or **#**.

4412D+ and 4424D+

4412D+ and 4424D+ Displays

- 2-line by 24-character.
- **Menu** —Takes you to MENU MODE screen (see figure).
- **▶** button—Takes you to next screen.
- **◀** button—Takes you to previous screen.
- **Exit** —Takes you to Home screen showing date and time.
- Four softkeys—Use to select items from display.

4424LD+

4424LD+ Display

- 7-line by 24-character.
- **Menu** —Takes you to MENU MODE screen (see figure below).
- **▷** button—Takes you to next screen.
- **◁** button—Takes you to previous screen.
- **Exit** —Takes you to Home screen showing date and time.
- Ten softkeys—Use to select items from display.

When you press **Feature**, a screen like the following appears with features to be selected.
