STUDIO MITO

The journey of "STUDIO MITO" begins in 1998 thanks to the interesting joining between the more than decennary experience of Stefano Pirro and the uniqueness expression of architect Gabriele Rossi.

The two designers found it more interesting to carry on contemporary living issues and trying to offer new solutions to continue "good drawings" logic of Italian design: purposeful and well-established in researching. The direct consequence was the multidisciplinary interest fields, preferring that ones mostly related to the two designers (architecture, industrial design, interior decoration), but even on that ones related to visual communication and artistic-formal (fashion, graphic design).

STUDIO MITO is always a work in progress: it is in constant researching of dialogue and collaboration between people with varied skills and competences.

Thanks to these premises, the Studio is able to satisfy every kind of design process need, counting on a prototypist and technical consultants group, who are always able to solve project realization problems, emphasizing the opening to constructive and sincere dialogue between the internal components and the many external collaborators.

They have given numerous lectures and workshops at various universities both in Italy and abroad. Apart from participating in various design exhibitions in Europe and U.S., STUDIO MITO has also been the subject of important retrospective shows mounted in prominent European cities, including Milan, Köln, Paris and London, and they have served as art director for a number of international design events. In addition, they have been invited to sit on prestigious juries for a variety of design competitions held both in Italy and abroad.

French Design Series

Alexandre Arazola is a French/Spanish professional furniture designer. During the years, he has been working with different design studios and design galleries for different projects through Europe and China.

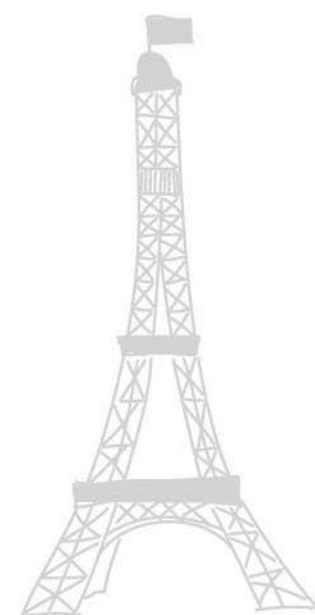

Alexandre Arazola

With 6 years design studies in France and 5 years of international working experience, his style is unique and adapted to the market: tender, creative, luxurious and modern.

From Barcelona to London, from Paris to Guangzhou, from short workshop in Aeronautical Industry to decoration of luxurious five stars hotels in Europe, he shown his creativity learning from people from different background.

With extraordinary passion and creativity, Alexandre Arazola exhibited his designs among other famous designer such as Philippe Starck, Karim Rashid, Shigeru Ban and Marcel Wanders.

His designs have been exhibited during well known international design shows such as Agora, Equip'Hotel, Dongguan Famous Furniture Fair, Maison & Objets and China International Furniture Expo.

ARCHETYPE

By definition, an archetype is an universal symbol. The body of ARCHETYPE chair is the purest shape that a chair could have and also a stylish geometrical solid structure. This body welcomes a decorative top part which complete the chair, giving it sense and meaning. ARCHETYPE chair speaks an universal language and asks: "What do you see when you look at me?". The answer and interpretation of the chair will be different depending on the spectator's origin and background.

FF1

FF1 chair is a tribute to the first plastic made shell chair in the 1950' s. We kept the outlines of the shell chair with it' s comfort and world appreciation. The improvement is that it is stackable, but with the legs included in the seat, which was a big technical challenge. The result is a well balanced comfortable stable chair.

FF1 Wood

Furniture market in western countries changed, and especially for this kind of chairs people buy a lot from internet and their first concern is: PRICE. Factories are making copies which the market do not longer accept due to the changing importation regulation in western countries. As market is not always easy to accept new designs, we kept the general outlines of the world appreciated shell chair, and we made it stackable, with wooden legs as the markets request. This chair proves that designer can provide market oriented designs, and is not an "artist" following his vision.

FLOWER dining table

Round dining table inspired by the nature. The nature offers magnificent complex geometric construction. After a study of the geometry of flowers, this is the designer' s humble interpretation of the perfection of nature.

CAPITAL dining table

A dining table inspired by the work of Brazilian architect Oscar Niemeyer in the 1960-70s. It reflects the beauty of freedom of shape mixed with well studied structured design. The good balance between straight lines and curves make it a well balanced table. CAPITAL table reminds us that furniture is like architecture, but at different scale. The name "CAPITAL" refers to the fact that the main work of freedom of Oscar Niemeyer was done in Brasilia, which is the capital of Brazil.
