

## Fall Protection-Online Course Outline

### **Overview:**

Working safely at elevations can be a matter of life or death. Falls are the 4<sup>th</sup> leading cause of workplace fatalities in general industry. This course will enable you to identify hazards associated with working at heights or on a roof, and introduce you to the procedures in case of an emergency.

### **Who should take this course?**

Workers that are required to be working above a height of 4 feet need to be aware of fall hazards and fall protection in order to prevent serious injury.

### **Learning Outcomes:**

After completing this course, you will be able to

- Know when and how to use fall protection equipment such as fall restraint and fall arrest systems
- Identify the hazards associated with elevating work equipment
- Identify the hazards associated with working on a roof
- Follow procedures in case of an emergency
