Medical Emergency Response in Industrial Environments Online Course Outline

Course Overview:
This course is designed to provide the learner with key information on the initial medical response skills necessary to evaluate and stabilize the patient prior to arrival of local EMS. Most often, this will only cover the first 15 minutes of the medical emergency, with EMS then arriving to take over patient management and transport. However, the first 15 minutes can be critical.

Who Should Take This Course?
Trained Medical Emergency Response Personnel

Course Objectives:
Upon Completion of this course, students will be able to:

- Control an accident scene while preventing further injury to rescuer or patient
- Conduct initial and secondary assessment of patients
- Give proper care for common injuries and illnesses

Prerequisites:
This course is limited to trained medical emergency response personnel and is intended to supplement existing knowledge on proper response to emergency incidents. People taking this course should have current certification in First Aid and Cardiopulmonary Resuscitation (CPR).

Topics:
- Scene Management
- The ABCs
- Management of Shock
- Secondary Survey
- Industrial Illnesses: Heat & Cold
- Industrial Injuries: Burns
- Industrial Injuries: Chemical Exposure
- Industrial Illnesses: Cardiopulmonary Diseases
- Other Industrial Illnesses
