Powered Industrial Truck/Forklift Safety Online Training Course Outline

Overview:
As required by 29 CFR 1910.178, operators of Powered Industrial Trucks must complete a specific program of training (including formal instruction, practical training and an evaluation of performance). This course assists in meeting training requirements by providing principles and procedures involved in the safe operation of these vehicles.

Who should take this course?
Potential operators of Powered Industrial Trucks, whether first-time users or experienced operators in need of a safety review, supervisors, company safety personnel, and maintenance personnel.

Learning Outcomes:
Upon completion of this course the student should understand the following as they apply to powered industrial trucks:
- Safety practices in preparing a truck for use
- Principles of stability
- Inspection protocol
- Safe driving practices

Topics:
- Types of Industrial Trucks
- Regulations
- Pre-use Inspections
- Fueling and Charging
- Safe Driving Practices
- Driving a Load

Prerequisites:
None

Registration:
