RAPTOR®

TOUGH AND TINTABLE PROTECTIVE COATING

IDEAL FOR A WHOLE RANGE OF APPLICATIONS...

...AND CAN BE USED ON VARIOUS SURFACES

RAPTOR Tough and Tintable Protective Coating is a durable urethane coating that provides surfaces with a protective barrier that can withstand the toughest situations.

Developed to tolerate most climatic conditions, RAPTOR is U.V. resistant and won't fade or "chalk" even after hours in the sun. RAPTOR is also waterproof and protects surfaces from rust, making it perfect for surfaces that will be submerged in water, including salt water.

RAPTOR's versatility makes it perfect for almost any application. Spray or roll RAPTOR on high traffic areas; it's scratch and stain resistant and easy to clean, simply hose it off. Its flexible formulation can handle impacts without cracking, making it perfect for its most popular application as a truck bed liner.

RAPTOR is unlike other bed liners or protective coatings. 2-component urethane technology far surpasses the durability of epoxy and 1-component coatings. And in case it does scratch (which is tough to do!), RAPTOR can easily be repaired. You can't do that with most of the other bedliners and protective coatings!

RAPTOR protects industrial surfaces in the harshest environments as well as the smaller surfaces we rely on every day. It's durable, tintable, looks great and lasts a long time.
