Atlas Dining Table - Smoked Glass and Metal

Information and care guide, please read and retain it for future reference

FEATURES OF GLASS

Glass is a practical material for a dining table as it's strong, spill-resistant, and easy to care for. All our glass is tempered or toughened and meets British Safety Standards. However, we recommend that you ensure that any glass table is made visible – by placing books or vases on the table, for example – so that nobody walks into it.

LEVELLING, ASSEMBLY AND MOVING PRODUCTS

- The table must be positioned on a level surface to ensure that it does not rock. The item has four adjustable feet, which can be altered if needed. If the product is moved, levels should be rechecked.
- Take care when moving products. We recommend they are lifted by two persons as dragging items across the floor will cause damage to the item

LEVELLING, ASSEMBLY AND MOVING PRODUCTS

- The table must be positioned on a level surface to ensure that it does not rock. The item has four adjustable feet, which can be altered if needed. If the product is moved, levels should be rechecked.
- Take care when moving products. We recommend they are lifted by two persons as dragging items across the floor will cause damage to the item
- As the item is self-assembly, it should be assembled at the intended location and lifted carefully into position.
- From time to time require tightening of all fixings may be needed to prevent loosening which can create squeaks and movement, full instructions are enclosed with your product.

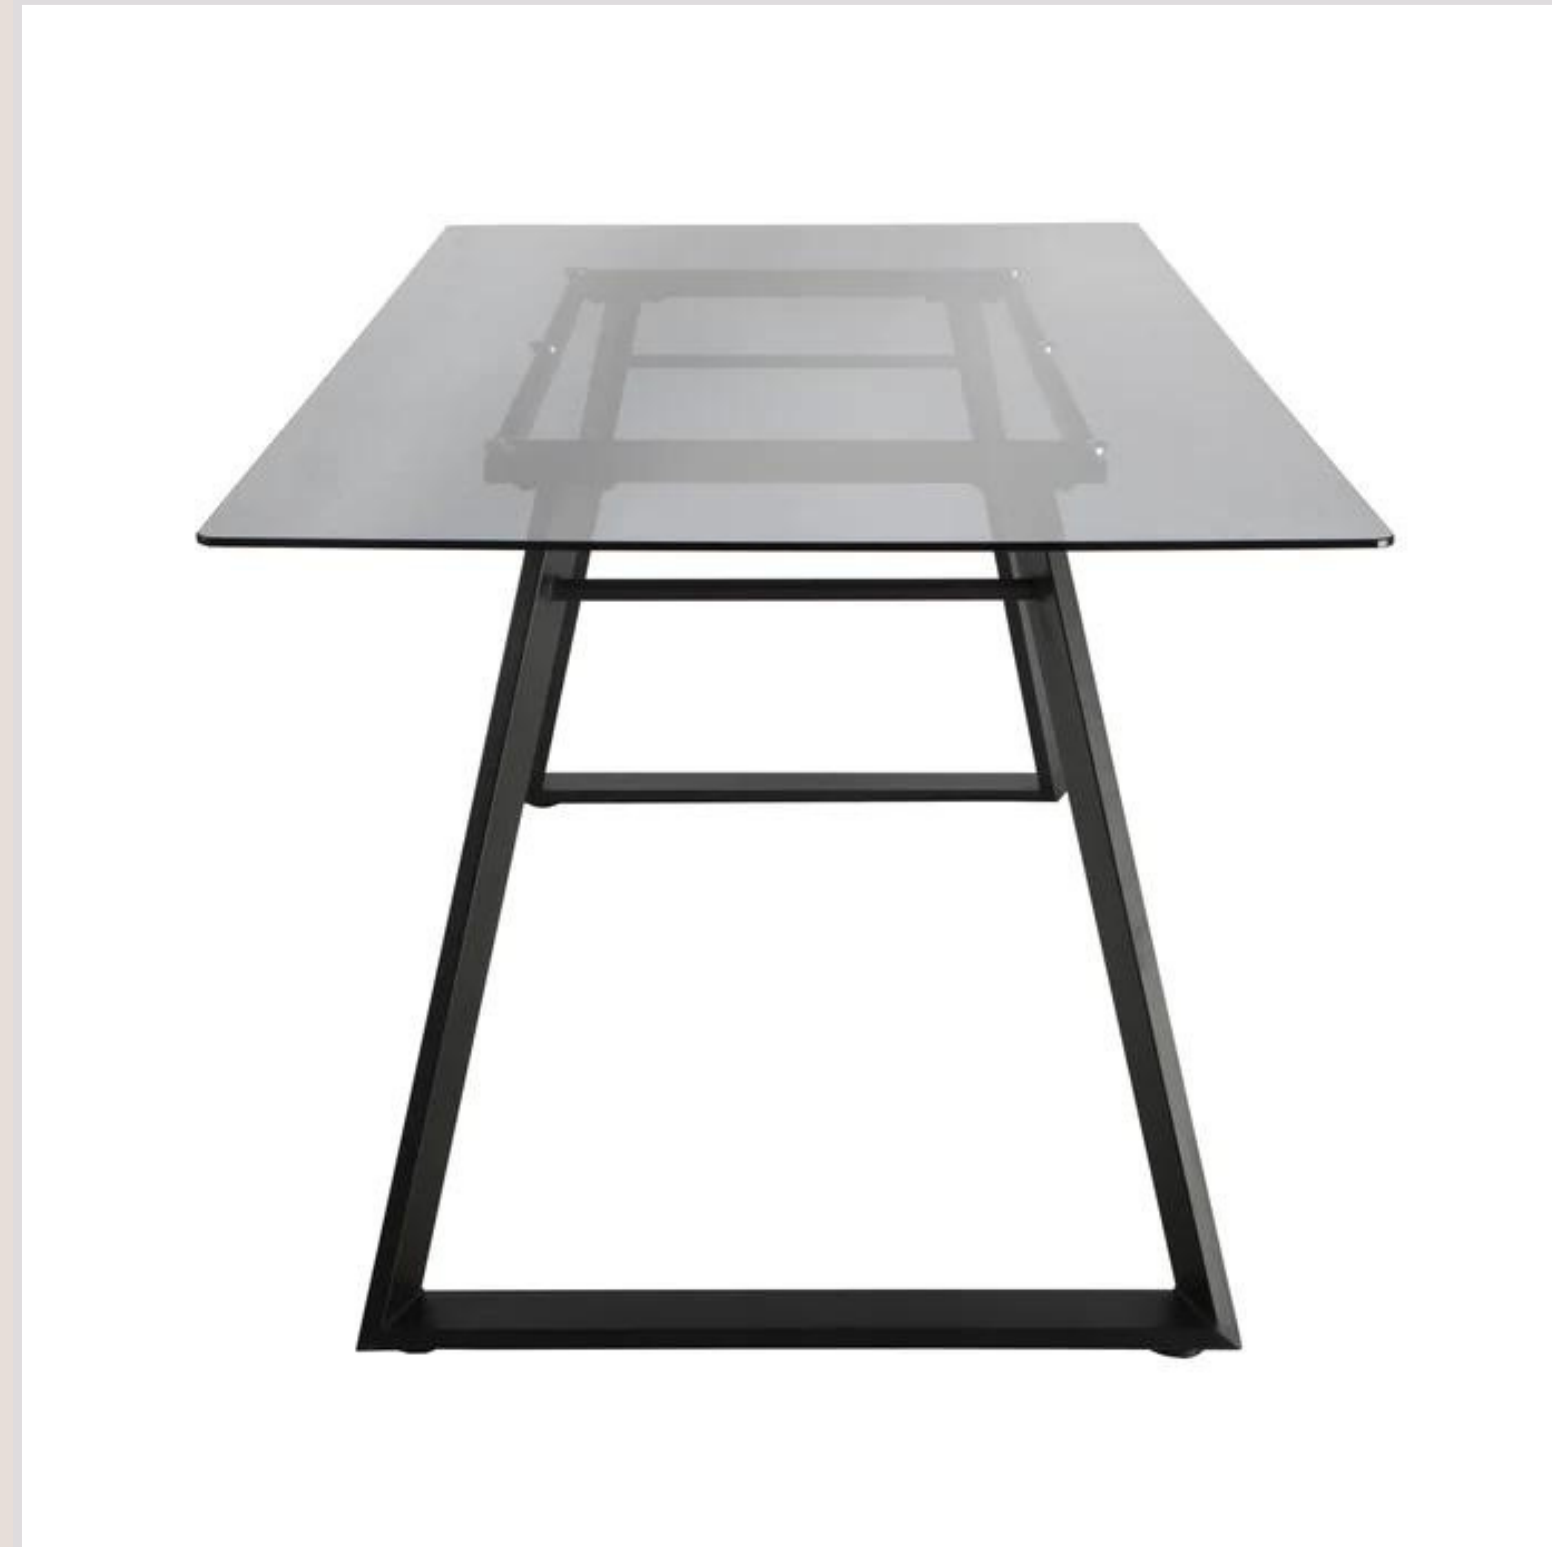

MAINTENANCE AND CARE INSTRUCTIONS

To prolong the life of your table we advise the following:

Cleaning

- Clean glass surfaces using a non-solvent-based glass cleaner and soft cloth, carefully avoiding contact with the metal sections.
- Follow cleaning instructions carefully, spills should be removed immediately by blotting with a dry white cloth. If the spillage causes staining or the piece requires routine cleaning, we recommend a specialist cleaner.
- Avoid using any washing powders or substances with abrasives, as this can scratch the glass.

MAINTENANCE AND CARE INSTRUCTIONS

To prolong the life of your table we advise the following:

- Never place hot dishes or mugs directly on to surfaces, use tablemats or coasters. Prolonged use of hot equipment e.g., a laptop, may cause scorching.
- Dark rubber feet used on some equipment may occasionally contain chemicals that can permanently mark surfaces so care should be taken.
- Do not drop furniture onto corners or feet, this will weaken and damage frames, feet or legs.
- Prevent sharp objects such as keys from coming into contact with your table.
- Do not use your table top as a chopping surface.
- Tempered or toughened glass should be handled carefully. In the event of an accident, the glass is designed to shatter into many tiny fragments to minimise the risk of injury. If there is any sign of damage to the glass, the glass pane must be replaced immediately.
- Avoid contact with any chemicals such as hair and skin preparations, fake tans, insect repellents and other cosmetics, or household cleaning materials, other than those recommended as these may affect the finish.
- If you have relevant insurance you may wish to contact your provider for advice.

Following the guidelines above will ensure product performance is maintained. Laura James is not responsible for defects caused by the misuse of your product.
