

Urn-liners

Protect your customer and your iced tea

Need to meet the urgent demand for customer health and safety for your iced tea and other fresh beverages? Liquibox urn-liners reduce bacteria by 99% and ensure each glass is delicious and free from impurities. They are the ideal hygienic solution to meet the heightened demand for sanitation standards for iced teas, iced coffees, lemonade, fruit drinks and more.

About Liquibox urn-liners

Urn-liners are disposable and hygienic liners used in fresh brewed iced beverage dispensing urns. Liquibox has been helping restaurants improve food safety with their original patented urn-liners for over 20 years.

Prepare for an extra-safe season for freshly brewed iced beverages with urn-liners

Features and benefits

The use of urn-liners provides a number of quality and operational benefits:

Food safety

- Reduces microbial contamination concerns from urn or spigot
- Prevents cleaning chemical residue in iced beverage
- Meets consumer demand for higher sanitation standards in response to COVID-19

Product quality

- Reduces cross contamination of flavor from the metal urn to the beverage
- Provides consistent high quality and better tasting product

Operational efficiencies

- Reduces the need for daily cleaning - one liner lasts 24 hours
- Improves urn, spigot and wrap life due to reduction in damage while cleaning

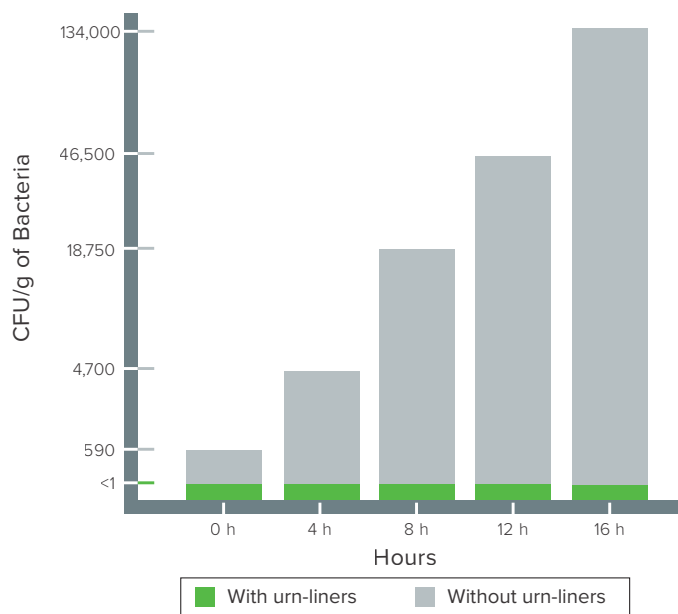

Your first cup of tea sold pays for the liner
