

PCSS™

NSF Approved Screw-on Connector for Beverage Dispensing

Rapak's PCSS+ connector is a universal screw-on connecting system for Bag-in-Box post-mix syrup, juice, and other beverages. Rapak's patented over-molded seal eliminates o-ring swelling and leaking when used with diet post-mix syrups and juices, thus reducing service calls to replace defective connectors.

Changing BIB Post-Mix with PCSS+

The PCSS+ is the most user-friendly post-mix connect and disconnect system in the market. It is no longer necessary to use the difficult to engage QCD system.

Features & Benefits

- NSF approved connecting system that can easily be cleaned and sanitized
- User-friendly and easy to screw on
- Patented over-molded seal
- Excellent thread engagement
- Compatible with both Rapak's PCSS fitment & Competitor's Encore® fitment
