

REOS

NSF Approved Line side Connector for Bag-in-Box Edible Oil

The Rapak Edible Oil System (REOS) connector is a universal screw-on connecting system for edible oil. The connector is designed with special food safe components to withstand cooking oil and oil based ingredients.

The REOS connector is ideal for commercial dispensing systems requiring constant evacuation, such as commercial popcorn makers in movie theaters. The REOS connector links the edible oil Bag-in-Box to dispensing systems in an efficient and hygienic way.

REOS Features & Benefits

- NSF approved connecting system that can be easily cleaned and sanitized
- User-friendly and easy to screw on
- Excellent thread engagement
- Patented over-molded seal
- Compatible with both Rapak's PCSS fitment & Competitor's Encore® fitment
