

GECKO TRAXX

Off-Road Wheelchair Access.

Any Terrain, Anytime, Anywhere.

An over-tyre that fits around the standard on-road 24" wheels of the wheelchair and adapts them to navigate sand, soft grass, snow and other soft, off-road terrains. The Gecko Traxx tyres are extremely light and pack down to a small size allowing them to come along wherever your next adventure takes you. The innovative and unique cross-section allows them to be unobtrusive when fitted to the wheelchair and expand when in contact with the ground, increasing in surface area.

- Portable
- No modifications required
- Light
- Easy to use
- Durable
- Suitable for a variety of terrains

**Note: Current size only suits a 24" wheelchair tyre size.*
