

## GREEN MAN CHAR BIOCHAR

FINE

**Green Man Biochar** is perfect for general gardening and agricultural needs. It is a fine grained char product that conditions the soil and enhances the soil's chemical and physical properties.

- ✓ Provides a home for beneficial soil microbes including mycorrhizal fungi
- ✓ Increases water and nutrient holding capacity of the soil
- ✓ Reduces fertilizer requirements
- ✓ Increases plant growth
- ✓ Can be used in gardens and lawns as a top dressing
- ✓ Stores carbon in the soil
- ✓ Produced sustainably from Australian biomass

**MIX WITH SOIL AT 1-10% FOR BEST RESULTS**

**WITH BIOCHAR**

**NO BIOCHAR**

## GREEN MAN CHAR HORTICULTURAL CHARCOAL

COARSE

**Green Man Horticultural Charcoal** is coarse grained, plant-derived potting medium, high in quality, and high in carbon.

- ✓ Enhances drainage of potted plants
- ✓ Perfect growing medium for orchids and epiphytes
- ✓ Increases soil water holding capacity
- ✓ Increases soil nutrient retention
- ✓ Encourages root growth and beneficial soil biota
- ✓ A suitable growing medium for hydroponics
- ✓ Stores carbon in the soil
- ✓ Produced sustainably from Australian biomass

**ADD TO POTTING MIX MATERIALS AT 10-20% FOR BEST RESULTS**

## GREEN MAN CHAR AQUACHAR

WATER SAVING

**Green Man Aquachar** absorbs water and releases it back to plants when required, storing water at the roots.

- ✓ High porosity and surface area increases the soil's water holding capacity
- ✓ Can significantly reduce water consumption
- ✓ Provides a home for beneficial microbes and symbiotic fungi
- ✓ It can be used as a natural alternative to water crystals in pots
- ✓ Stores carbon in the soil
- ✓ Produced sustainably from Australian biomass

**ADD AROUND PLANTS AT 5-20% TO IMPROVE WATER HOLDING PROPERTIES**
