

Our Products

At Green Man Char we offer char based soil improvers for all your gardening and horticultural needs.

Our products improve the physical structure of soil, increase its water holding capacity, increase nutrient retention and enhance plant growth. They provide a home for beneficial soil microbes whilst sequestering carbon from the atmosphere – helping combat climate change.

We believe Green Man Char is an exciting local solution to a global problem. Buying our products means you are doing your bit to ensure a more sustainable future for our planet.

Our products are all derived from sustainable Australian biomass resources and produced locally with Australian technology.

SUSTAINABLY AUSTRALIAN

The Green Man Story

The Green Man is an ancient symbol of rebirth and nature. It embodies the challenge of sustainability in our modern world.

Green Man Char products provide enhanced plant growth, reduced fertiliser use, soil improvement and carbon sequestration.

At Green Man we aim to reduce waste, capture all available resources and help create a more sustainable economy in which both the environment and humanity can prosper.

Biochar - Horticultural Char - Aquachar

"Biochar may represent the single most important initiative for humanity's environmental future"

Dr. Tim Flannery
Australian of the Year 2007
