How to build
The Lowdown

Mustard lockers are beautifully designed to make putting them together simple + argument free! No tears + no Allen keys! All you need to get started is a Phillips head screwdriver!

We've made a video taking you through the build step by step. Watch it here: mustardmade.com/build-it. It's easy, you got this!

We recommend you attach the locker to the wall to prevent tipping + causing injury. Use the extra screws + plugs to screw through the two holes in the back panel (as required for your wall).

---

1. Stand both legs up + push the side panels down onto the legs.

TIP: make sure the legs face the right way!

2. Slide the middle frame onto the legs.

TIP: make sure the legs face the right way!

3. Push the back panels into place, starting at the bottom.

4. Fold down the tabs on the four corners of the back panels.

TIP: the slots go at the top!

5. Add the bases, starting at the front. Push the bases down into place.

6. Add the top panel starting at the front. [You might need an extra pair of hands for this bit!]

7. Check from all angles that the side + back panels are slotted in correctly.

8. Add the brackets + place the shelves on top. Use the round holes to help you measure the height.

9. Insert the post + large washer in the hole in the leg.

10. Slide the door down onto the post.

11. Add the second door. Grab your screwdriver! Use your screwdriver to attach the handles with the small screws + small washers.

12. You're amazing! Pat yourself on the back + fill your locker with things.

P.S. pop the spare keys in a safe spot just in case!

---

8 x brackets
2 x posts
2 x large washers
2 x L shape posts
4 x screws
4 x small washers
2 x handles
2 x sets of keys (attached to door)
2 x keyrings
you got this!
