How to build The Twinny

Mustard lockers are beautifully designed to make putting them together simple + argument free! No tears + no allen keys! All you need to get started is a philips head screwdriver!

We’ve made a video taking you through the build step by step. Watch it here: mustardmade.com/build-it. It’s easy, you got this!

We recommend you attach the locker to the wall to prevent tipping + causing injury. Use the extra screws + plugs to screw through the two holes in the back panel (as required for your wall).

1. Stand both legs up + push the side panels down onto the legs.
   **TIP:** make sure the legs face the correct way!

2. Slide the middle frame onto the legs.
   **TIP:** the slots go at the top!

3. Push the back panels into place, starting at the bottom.

4. Fold down the tabs on the four corners of the back panels.

5. Add the bases, starting at the front. Push the bases down into place.

6. Add the top panel starting at the front. (You might need an extra pair of hands for this bit!)

7. Check from all angles that the side + back panels are slotted in correctly.

8. Insert the rails + pull down to click in.

9. Slide the door down onto the post.

10. At the top of the door, insert the L shape post up into position through the holes. Bend the tab up.

11. Add the second door.

12. Grab your screwdriver!

Wow! Look what you’ve built! Now you can play around with where you’d like the shelves + live tidily ever after!

P.S. pop the spare keys in a safe spot just in case!

---

16 x brackets
2 x posts
2 x large washers
2 x L shape posts
4 x screws
4 x small washers
2 x handles
2 x sets of keys (attached to door)
2 x keyrings

---

Check from all angles that the side + back panels are slotted in correctly.

---

Insert the rails + pull down to click in.

---

Add the brackets + place the shelves on top. Use the round holes to help you measure the height.

---

Click the top into place.

---

Click the top into place.

---

Check from all angles that the side + back panels are slotted in correctly.

---

Add the bases, starting at the front. Push the bases down into place.

---

Add the top panel starting at the front. (You might need an extra pair of hands for this bit!)

---

Bend the tab up.

---

Push the back panels into place, starting at the bottom.

---

Add the bases, starting at the front. Push the bases down into place.

---

Slide the middle frame onto the legs.

---

Add the top panel starting at the front. (You might need an extra pair of hands for this bit!)

---

Slide the middle frame onto the legs.

---

Stand both legs up + push the side panels down onto the legs.

---

Add the bases, starting at the front. Push the bases down into place.

---

Add the top panel starting at the front. (You might need an extra pair of hands for this bit!)

---

Stand both legs up + push the side panels down onto the legs.

---

Add the bases, starting at the front. Push the bases down into place.

---

Push the back panels into place, starting at the bottom.

---

Add the top panel starting at the front. (You might need an extra pair of hands for this bit!)

---

Stand both legs up + push the side panels down onto the legs.

---

Add the bases, starting at the front. Push the bases down into place.

---

Push the back panels into place, starting at the bottom.

---

Add the top panel starting at the front. (You might need an extra pair of hands for this bit!)

---

Stand both legs up + push the side panels down onto the legs.
you got this!
