FIRE FIGHTING MEASURES

Hazards from combustion products

This product is likely to decompose only when heated to dryness.

Complete decomposition is likely to release carbon dioxide; incomplete combustion is likely to release carbon monoxide and smoke.

Suitable extinguishing media

Use extinguishing media most appropriate for the surrounding fire such as water, foam or dry agent (carbon dioxide, dry chemical powder). If safe to do so, move undamaged containers from the fire area. If a significant quantity (>200L) of this product is involved in a fire, call the fire brigade.

Specific hazards arising from the chemical

There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

This product is likely to decompose only after heating to dryness, followed by further strong heating.

Precautions in connection with fire

Wear SCBA and chemical splash suit. Fully encapsulating, gas-tight suits should be worn for maximum protection.

ACCIDENTAL RELEASE MEASURES
