

DOONEY & DAUGHTERS

Brush Guide

Pro-Hybrid Round Brush

These brushes are your everyday go to brush. Perfect for chairs, legs, carved details and to create subtle texture.

Natural Bristle Brush

This is the wax brush. Designed to help you easily apply your wax, you can also use it with chalk paint to create a heavily textured finish.

Flat Brushes

These come in multiple sizes, from small detail brushes to extra-large wall brushes. These are great for a smooth, flat finish and work perfectly with the Velvet Luxe and Premium Lacquers. Our favourite size is the 2inch - a good multi-purpose size.

Angle Detail Brush

This is great to get into details, paint handles and to do anything fiddly. This is a brush that we use for most projects.

Small Artist Brush

This is used for detail work and to apply gilding wax. It's also perfect for blending paints when doing decoupage.

Spalter Brush

This is the best brush when using the metallic cremes and glazes. It's designed to give a smooth and flawless finish.
