press + wash DISPENSERS

Established in over 900,000 hotel rooms world wide

Global Warming, Conserving of Resources, Reduction of Waste and Environmental Issues are on top of everyone's agenda. The hospitality industry is now at a tipping point and has the opportunity to make these important issues a priority as well.

It is estimated that the world's hotels dispose of well over 10 Billion (10,000,000,000) pieces of product and packaging from partly used guest bathroom amenities every year. It is therefore essential for every hotel, motel or resort to focus on environmentally responsible options for their bathrooms, such as the revolutionary PRESS + WASH amenities dispenser system.

PRESS + WASH IS THE ENVIRONMENTALLY RESPONSIBLE SOLUTION FOR YOUR HOTEL BATHROOM

PRESS + WASH dispensers have numerous advantages:

For you, the hotelier:

- ⊙ Considerable cost savings on amenities
- ⊙ Elimination of waste
- ⊙ Reduction of room servicing time
- ⊙ Reduced use of cleaning chemicals
- ⊙ Environmental promotion opportunity
- ⊙ No wear and tear, no maintenance, no refilling
- ⊙ Theft and tamper proof locking system
- ⊙ Quick and simple fitting into new or existing bathrooms

For your hotel guest:

- ⊙ High quality toiletries
- ⊙ Absolute hygiene and guaranteed product safety
- ⊙ Attractive design and wide choice of products
- ⊙ Simple operation

1. Closed system / Product liability

press + wash, is the first patented closed-system and factory sealed dispenser, which is especially designed for 3½ to 5 star hotels, motels and resorts.

Ultimate hygiene is guaranteed as closed-system dispenser means; there is no messy and time consuming refilling of the dispensers necessary and neither the hotel staff nor the hotel guest come into direct contact with the liquid product before washing, thus avoiding all possibility of germ contamination.

press + wash is a child, theft and tamper-proof dispenser system. It is guaranteed drip-free and never leaks.

2. No wear and tear

press + wash contains no wearing parts. The dispensing mechanism is integrated into the dispenser bottle itself and is therefore automatically renewed each time a dispenser refill is being changed.

press + wash has no mechanical pumps, springs or levers, which are parts highly susceptible to clogging or wear & tear and can also be a problem in regards to hygiene.

3. Recycling / PET

The dispenser bottle and its internal dispensing mechanism are both made from PET plastic (like soft drink bottles) and are therefore fully recyclable.

Partly used portion control amenities create a great deal of waste, whereas with press + wash, the contents is used up until empty.

4. Ease of use

This system is easy to use for both, the hotel guest and hotel staff. A gentle squeeze of the bottle will dispense just the required amount of soap or shampoo.

As refilling is not necessary, there is no mess and only minimal time is required for changing of the simple clip-in / clip-out press + wash refills.

Each dispenser contains 300ml of product. The press + wash system is small, visually attractive and the dispenser bottle only has to be replaced every 3 – 4 weeks. This translates into time and cost savings.

5. Product range

press + wash dispensers are available in a choice of different product brands. This enables the hotelier to choose the most suitable product range, corresponding with the style, decor and star rating of the hotel, motel or resort.

Each product range has various products to offer: Shampoo Hair & Body (Conditioning Shampoo formulated for use also as Body Wash) , Liquid Cream Soap and Body Lotion. Some ranges include separate Conditioning Shampoo and Shower Gel products.

6. Product Quality

All our products are of the highest quality, dermatologically tested and with a skin neutral level of pH 5.5. All our products are alcohol free.
