Appliance Modules AM486 (2 pin) and AM466 (3 pin)

Setting The Module’s Code
Using a small screwdriver, set the red House Code dial to the same letter as your Controllers. Set the Black Unit Code dial to any unused number.

Ratings
The Appliance Module can be used to control an incandescent lamp rated up to 500W. It can also control other types of lamps such as fluorescent or energy saving lamps, low voltage lamps, or lamps that include a dimmer control. And of course it can be used to control appliances. Caution: Observe the ratings on the label on the back of the Appliance Module.

1. Set the House Code and Unit Code.
2. Plug an appliance into the Module.
3. Plug the Module into the same wall outlet as your controller (see testing below).

Testing The Module
Make sure the appliance’s switch is on. Plug the Module into the same wall outlet as your controller, press the On and Off buttons on the controller that correspond to the Unit Code setting on the Module. If the Module turns on and off you can unplug the Module or Controller and move it to its permanent location. If you can’t control the module, visit http://www.x10.com/support for help.

X10 Wireless Technology, Inc. 90 Day Limited Warranty
X10.com, a division of X10 Wireless Technology, Inc. (X10) warrants X10 products to be free from defective material and workmanship for a period of 90 days from the original date of purchase at retail. X10 agrees to repair or replace, at its sole discretion, a defective X10 product if returned to X10 within the warranty period and with proof of purchase.

If service is required under this warranty:
1. Visit www.x10.com/support/return_policy.htm, or e-mail sales@x10.com to obtain a Return Merchandise Authorization (RMA) number.
2. Return the defective unit postage prepaid to X10 (see address on back).
3. Enclose a check for $4.00 to cover postage and handling.
4. Enclose a dated proof of purchase.
5. X10 is not responsible for shipping damage. Units to be returned should be packed carefully.
