

FireCracker™ RF Computer Interface/Transceiver

Model CM19A

INSTALLATION INSTRUCTIONS

The CM19A Computer Interface sends and receives Wireless Radio Frequency (RF) signals, and works with X10's MultiView, X-Ray Vision, Vanguard Internet Control Center, Sentinel Internet Control Center, and ActiveHome Pro + all plug-ins and mobile apps. It receives RF commands from X10 motion detectors (sold separately) and communicates these commands to the X10 software. The software interprets these commands and tells the CM19A to transmit the appropriate RF commands to a TM751 Transceiver (sold separately). The CM19A therefore works with the X10 software to automatically turn on lights, appliances, and cameras when X10 motion detectors are tripped.

The CM19A requires Windows® XP, Windows® Vista, or Windows® 7.

IMPORTANT: Install the X10 software BEFORE you connect the CM19A to your PC.

1. Download the desired software application from:
www.x10.com/software
2. Install the software following the instructions that came with it.
3. When instructed during the installation process plug the CM19A into any unused USB port.
4. Windows will recognize the CM19A and complete the installation. Refer to the application's help file for additional information.
