

Glass Break Sensor, Model GB10A Set Up and Operating Instructions

Installing the GB10A Sensor

- Peel off the paper from the double sided tape on the back and attach the Sensor to the inside of a window that you want to protect.
- Slide the battery compartment off and install two AAA alkaline batteries, observing polarity.
- Set the switch to 2 to make the unit more sensitive to vibration, or 1 for less sensitive (helps prevent false alarms).

Registering the GB10A Sensor with the Security Console

- Set the slide switch on the Security Console to INSTALL.
- Press the TEST button on the GB10A Sensor. The console beeps once to confirm and the next available zone LED lights.
- Return the console slide switch to the RUN1 or RUN2 position.

Testing the GB10A Sensor

- Set the slide switch on the Security Console to RUN2.
- Press TEST on the GB10A. The console beeps to acknowledge and the zone LED lights.

*Note: you can install a total of 16 zones in the Console. This can be a combination of Door/Window Sensors, Motion Detectors, and Glass Break Sensors. See your Security System Owner's Manual for more information.

Operation

The GB10A is sensitive to vibration. When the security system is armed, the vibration caused by breaking glass will set off the alarm. You can test this by tapping on the window that the GB10A is attached to.

Replacing batteries

Open the battery compartment and replace the batteries with two AAA alkaline batteries. After replacing the batteries, the following steps are necessary to determine that the Console still recognizes the GB10A.

- Place the Console's slide switch to RUN2.
- Press TEST on the GB10A. If the Console chimes, it recognizes the GB10A and no further action is necessary.

If the Console did not chime:

Place the Console's slide switch to INSTALL. Press TEST on the GB10A. The Console beeps and logs in the GB10A to the next available zone. To make sure the Console logs the GB10A back into the same zone it was allocated to before you changed the batteries, wait 4 hours after removing the old batteries before reinstalling (until the zone indicator on the Console starts flashing).

X10 Wireless Technology, Inc. Limited One Year Warranty

X10.com, a division of X10 Wireless Technology, Inc. (X10) warrants X10 products to be free from defective material and workmanship for a period of one (1) year from the original date of purchase at retail. X10 agrees to repair or replace, at its sole discretion, a defective X10 product if returned to X10 within the warranty period and with proof of purchase.
