**KR19A SlimFire™ Remote installation and operating instructions**

The KR19A works with the TM751 Transceiver. It lets you turn on and off two individually coded X10 Modules and brighten and dim lights connected to Lamp Modules and Wall Switch Modules. In the default state (after first fitting the battery) the KR19A is set to Housecode A. The first (top) two ON-OFF buttons control modules set to Unit Code 1. The second (middle) two buttons control A2.

1. Plug in an X10 TM751 Transceiver (sold separately).
2. To turn on or off X10 Modules set to Unit Code 1 (on Housecode A) press the first (top) ON or OFF button. To turn on or off X10 Modules set to Unit Code 2 (on Housecode A) press the second (bottom) ON or OFF button. To brighten or dim Lamp Modules or Wall Switch Modules press the number button first, then the Bright or Dim button. If you want to control Modules 1 and 2 on Housecode A, that’s it. You don’t need to read any further.

**To change the Housecode**

- Press and hold the first (top) ON and OFF buttons at the same time for 2-3 seconds to enter Program Mode (the LED stays on).
- Press and release the first (top) ON button the appropriate number of times for the Housecode you want to set. Once for A, twice for B, etc. The LED blinks off for each press.
- Press the second (bottom) ON or OFF button to return to Normal Mode. The unit will also return to Normal Mode if no keys are pressed for more than 30 seconds.

**To change the Unit Code for the first (top) two buttons** (the second pair of buttons are always one # higher than the first pair, i.e. if you set the first button to 6, the second button controls 7, etc.).

- Press and hold the first (top) ON and OFF buttons at the same time for 2-3 seconds to enter Program Mode (the LED stays on).
- Press and release the first (top) OFF button the appropriate number of times for the Unit Code you want to set. Once for 1, twice for 2, etc. The LED blinks off for each press.
- Press the second (bottom) ON or OFF button to return to Normal Mode. The unit will also return to Normal Mode if no keys are pressed for more than 30 seconds.

**NOTE:** If you want to change the Housecode AND Unit Code, change both of them before pressing the second (bottom) ON or OFF button to return to Normal Mode.

**To change the battery:** Pry the unit apart and fit a CR2025 3V Lithium battery. Observe polarity.

**F.C.C. CAUTION - THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.**

**NOTE:** NO CHANGES OR MODIFICATIONS MAY BE MADE TO THE UNITS. ANY CHANGES MADE TO THE UNITS WILL VOID THE USER’S AUTHORITY TO OPERATE THE EQUIPMENT.

**X10 Wireless Technology, Inc. 90 Day Limited Warranty**

X10.com, a division of X10 Wireless Technology, Inc. (X10) warrants X10 products to be free from defective material and workmanship for a period of 90 days from the original date of purchase at retail. X10 agrees to repair or replace, at its sole discretion, a defective X10 product if returned to X10 within the warranty period and with proof of purchase.

If service is required under this warranty:
1. Visit www.x10.com/support/return_policy.htm, or e-mail sales@x10.com to obtain a Return Merchandise Authorization (RMA) number.
2. Return the defective unit postage prepaid to X10 (see address on back).
3. Enclose a check for $4.00 to cover postage and handling.
4. Enclose a dated proof of purchase.
5. X10 is not responsible for shipping damage. Units to be returned should be packed carefully.

**Please visit www.x10.com/support for help.**
Mini Timer MT13A
A Controller, Timer and Alarm Clock all in one! Programs up to eight X10 Modules to go on and off at specific times, up to a total of 64 timed events. Controls eight modules instantly. Dims lights too.

Maxi Controller SC503
Lets you control up to 16 X10 Modules at the touch of a button from anywhere in the house. Dims lights too!

Mini Controller MC10A
Lets you control up to eight X10 Modules at the touch of a button from anywhere in the house. Dims lights too!

2-Way Home Control Interface CM15A
Set up from a PC to control up to 256 X10 Modules. ActiveHome Pro software download & USB cable included.

Thermostat Set-Back TH2807
Automatically sets-back your central heating/air conditioning. Mounts on the wall under your existing thermostat and plugs into an Appliance Module.

Wireless Remote Control System RC5000
Lets you control 16 X10 modules from inside or outside your home. Can also dim and brighten Lamp Modules and Wall Switch Modules. Works with the HR12A PalmPad Remote and X10 RF Wall Switches (SS13A, SS15A).

Lamp Module LM465
Can be Dimmed and Brightened from any X10 Controller. Responds to “All lights on”. Rated for 300 W. Incandescent only.
2-Way version LM14A.

SocketRocket LM15A
Screws into an existing light fixture. Controls up to 150W, incandescent only.

Appliance Module - AM486/AM466
Two pin polarized (AM486) or 3 pin grounded (AM466). For controlling an air conditioner, TV, stereo, etc. anywhere in the home. Rated 15A for heaters, coffee pots etc.; 1/3 H.P. for motors; 400W for TVs; 500W for lamps. 2-Way versions available AM14A (2 pin), AM15A (3 pin).

Wall Switch Module WS467
For controlling important indoor and outdoor security lights. Replaces your existing wall switch and installs like a regular dimmer. Dimmed/brightened from any X10 Controller. Rated 500W incandescent only.

3 - Way Wall Switch Module WS4777
For controlling a light which is controlled by two switches. Same features as WS467.

Split Receptacle Module SR227
Replaces existing wall outlet. The top outlet functions like an Appliance Module, the bottom one is a regular outlet. Rated 15A.

Universal Module UM506
Isolated contact relay and beeper. Can be set for momentary or continuous operation. Not compatible with X10 security systems.
