

KR19A SlimFire™ Remote installation and operating instructions

The KR19A works with the RR501 (part of the RC5000) and the TM751 (part of the RC6500). It lets you turn on and off two individually coded X-10 Modules and brighten and dim lights connected to Lamp Modules and Wall Switch Modules. In the default state (after first fitting the battery) the KR19A is set to Housecode A. The first (top) two ON-OFF buttons control modules set to Unit Code 1. The second (middle) two buttons control A2.

1. Plug in an X-10 Transceiver (RR501 or TM751, sold separately).
2. To turn on or off X-10 Modules set to Unit Code 1 (on Housecode A) press the first (top) ON or OFF button. To turn on or off X-10 Modules set to Unit Code 2 (on Housecode A) press the second (bottom) ON or OFF button. To brighten or dim Lamp Modules or Wall Switch Modules press the number button first, then press Bright or Dim button. If you want to control Modules 1 and 2 on Housecode A, that's it. You don't need to read any further.
