Product Features

Work with speed and comfort

Focus on the work at hand with a 3-sided narrow border. The large touchpad and keycaps, along with a lift hinge for more ergonomic wrist angles and increased airflow, all make for more relaxed use. An array of ports and slots means you can get connected to what you need and a spill-resistant keyboard means less stress if an accident happens.

Stay protected

The Trusted Platform Module 2.0 is a commercial-grade security chip installed on the motherboard that creates and stores passwords and encryption keys. It verifies that the computer has not been tampered with before booting up and protects your data against external software attacks.
