

# WHITE / DUMPY TREE FROG care sheet

## PET DEPOT

### CAGING NEEDED

10-20 gallon tank with secure lid. Provide large pieces of driftwood, artificial non-toxic plants, bark and branches with enough room to climb.

### BEDDING & WATER NEEDS

Fine, particulate soil or ground coconut fiber (Advised not to use mulch/wood chips because they might get stuck in the frog's throat when eating). Make sure to use soil that retains moisture. Provide fresh clean chlorine-free water in a large shallow bowl daily.

### LIGHTING & UVB

Provide a basking lamp. Tree frogs do not require lighting.

### TEMPERATURES & HUMIDITY

Temperature should range from 68 at night, 75° to 80°F during the day.

### DIET

Live gut-loaded crickets and worms. They can also eat pinkies or fuzzies. Sprinkle insects with calcium daily and with a mineral supplement once or twice a week.

### MISC. INFORMATION

Active at night (nocturnal). Lack of ventilation may cause respiratory issues.

### AVERAGE SIZE

Most females can grow from 4 to 5 inches. Males are slightly smaller.

### LIFE SPAN

7 - 20+ years.
