THANK YOU FOR PURCHASING WULF.

You have acquired a Wulf timepiece which we hope will give you great pleasure. This watch is an original creation made and tested to meet the traditional standards of Swiss quality. We guarantee that this watch has been manufactured with the greatest care.

This Wulf timepiece is warranted for a period of Two Years from the date of purchase against manufacturing defects under the terms and conditions of the warranty. A valid warranty card must be correctly completed and stamped by an authorized dealer, clearly stating the purchase date with a valid proof of purchase like an invoice or receipt.

Please send the defective timepiece with a description of the problem and a valid store receipt to our authorized distributors or return the timepiece to the place of purchase. Loss or damage during shipping will not be covered. The timepiece will be repaired if possible or otherwise replaced with a product of equal or higher retail selling price. This limited warranty is in place of all other express and implied warranties of any kind, which are hereby excluded. Wulf will not be responsible for any indirect, incidental or consequential damages arising from the use of the timepiece.

This warranty does not cover the lens, case, strap or bracelet, damages from improper use or rough treatment, corrosion from saline solution, unauthorized repairs/ modifications, negligence or normal wear and tear. For non-warranty service, a minimal repair fee will be charged according to the work requested.

Assuredly he moves.
Poised for victory in each pace.
There, behold the Wulf.

CHANGING THE FACE OF HISTORY

Why follow history, when you can invent it?

At Wulf, we zero in on creating contemporary timepieces that embody the attributes a Wulf should possess: precision, intelligence, toughness, and most importantly, inimitable style. Because in an arena where pretenders quickly get exposed, the rule to abide by is change, or be forgotten.

Forgoing the designs of traditional Swiss watch brands, our watches sport customised movements housed within a unique aesthetic framework developed by the Wulfpack – our specialised team of watch designers and industrial engineers. Hailing from Zurich, they stay bonded through one common purpose: redefining the art of watchmaking. That's what we call Wulfcraft.

CARE & PRECAUTIONS

- Push buttons are not to be operated under water.
- Never attempt to open the case or remove the back cover, otherwise, dust may affect the movement.
- Should water or condensation appear in the watch, have the watch checked immediately, corrosion of parts can occur inside the case if left unlocked.
- Avoid exposing the watch to extreme temperature.
- Avoid severe impact. The watch is designed for normal use. It is inadvisable to subject it to severe impact or rough usage.
- Clean the watch with a soft cloth and clean water only. Avoid using chemicals - especially soap as the waterproof gasket will corrode.
- Keep the watch away from the conditions of strong electric field and static electricity.
- Repair and maintenance should only be carried out by authorized

service centers, otherwise the water resistance will be compromised. The warranty will also be voided.

- Calendar positions may vary depending on the design, however the functions and settings will still be the same.
- Maintain the mechanical watch by, e.g. clearing and lubricating, once every 2 – 3 years. Wind the watch up periodically if it is not worn for a long time to keep the movement running.

3 HANDS & SKELETON

Caliber W01 & W02

A. DISPLAYS & BUTTONS

B. WINDING

- 1 Automatic winding of the movement occurs as the rotor turns freely. (It automatically winds as you wear the watch in normal usage.)
- 2 You can also wind the watch fully by manually turning the crown with 45 full turns.
- 3 The watch can run at least 36 hours when fully wound, even if it is not in use.

DAY/NIGHT MULTIFUNCTION

Caliber W03

A. DISPLAYS & BUTTONS TIME / YEAR / MONTH / WEEK / DATE

B. WINDING

- 1 Automatic winding of the movement occurs as the rotor turns freely. (It automatically winds as you wear the watch in normal usage.)
- 2 You can also wind the watch fully by manually turning the crown with 45 full turns.
- 3 The watch can run at least 36 hours when fully wound, even if it is not in use.
- 4 It is recommended that the User wind the watch once every 24

C. TIMES SETTING

- 1 Pull the crown to position II. (The watch stops).
- 2 Turn the crown to set the correct time.
