micro⁺

Instructions For Use:

1. Register S/N at bottom of packaging or top of Micro+ Battery at GPEN.COM/REGISTER.

2. Fully charge G Pen Micro+ Battery from USB-C charging port located at bottom of device:
   - Button LED will flash RED while charging
   - Button LED will turn solid GREEN when fully charged
   - Button LED will flash five times when battery is low
   - Button LED will flash RED and GREEN five times when there is a tank connection issue

3. Press button five times to power ON / OFF Micro+ Battery.

4. Press button three times to toggle between heat settings:
   - Blue = Low Heat
   - Green = Medium Heat
   - Red = High Heat

5. Manual Heating: Hold button down to activate manual heating. LED will flash during heat-up and turn solid once the preset temperature is reached.

6. Automatic Heating: Press button twice to activate automatic heating. LED will flash during heat-up and turn solid once preset temperature is reached.

7. Inhale from mouthpiece once the LED turns solid.

8. Once preset temperature is reached, active heating can continue for a maximum duration of 10 seconds before automatically shutting off

9. Device will power off automatically after 5 minutes of inactivity.

10. Cleaning & Maintenance:
    a. The ceramic airpath in the Micro+ Mouthpiece can be separated from the silicone sleeve and cleaned.
    b. To clean and/or replace the Micro+ Tank, twist off mouthpiece assembly from the battery, then twist off Micro+ Tank.

11. *HOT SURFACE WARNING*: Do not remove tank cover and/or handle Micro+ Tank for five minutes after use.
