

TRANSFORMING THE CARE OF YOUNG ADULTS IMPACTED BY CANCER

MISSION: CRITICAL MASS is a community-powered advocacy organization that brings together a diverse coalition of patients, providers, and stakeholders who all know too well the devastating impact cancer can have on the life of a young adult. We are the only organization in the country that raises awareness about young adult cancer and works to enact public policy solutions to remove barriers specific to young adults across different diseases and disciplines. We are united for one purpose: to help young adults survive and thrive after a cancer diagnosis.
