

ACCELERATE THE NUMBER OF
POWERFUL WOMEN IN TECH AND LEADERSHIP

MISSION: The mission of WOMEN TECH FOUNDERS is to inspire more women to pursue a career in technology and leadership. WTF tells the stories and lessons learned of women who are already making waves in the field, so that we can inspire, educate and connect women in the tech ecosystem, from startup founders to funders and leaders. We use storytelling, video and networking events to build deep connections, drive inclusiveness through profitability, and infuse diversity into tech. Our vision is a tech industry that drives everyone's potential to reach their dreams, advance business, and change the world.
