

Installation Instructions for RF9C and RF10C Raised Floor Boxes

The RF9C and RF10C floor boxes come completely assembled with device plates and cover assembly in place.

To install:

- 1) Cut hole in raised floor using box base as a template.**
- 2) Install box in hole.**
- 3) Box can be fastened to the raised floor through the mounting flange by removing the cover assembly fastening the flange to the floor, and then re-installing the cover assembly.**
- 4) Remove device plates and install devices and wire as specified.**
