

THE ULTIMATE GUIDE TO BRIDAL BEAUTY AND ACCESSORIES

Literally everything you need to get you down the aisle.

When you have a wedding looming on the horizon, you'll take any excuse to go all out (really, *all out*) with your beauty routine. We'll also take that as an excuse to do some serious shopping. It's all very serious when it's time to get married.

Except that the serious business in question is doing ten thousand face masks, getting waxed, painting your nails, and feeling like your most beautiful self—it's more fun and games than intensive labor. In case you haven't noticed, it's wedding week (!) so in the spirit of all things bridal, we called in a few of our tried-and-true, no-joke beauty products, and paired them with a handful of accessories that would make any bride proud.

If you're concerned with spots, rely on gentle acne fighters with clarifying natural ingredients—they won't dry you out, but will help keep clog-prone skin under control. In a pinch, Renee Rouleau's Night Time Spot Lotion should heal any last-minute zits overnight.
