

HOW TO PICK THE RIGHT CLEANSER FOR YOUR SKIN TYPE

Tips from the experts, right this way.

MILK CLEANSER

If your skin is dry, sensitive, or prone to redness, a milky hydrating cleanser may be the option for you. While they don't foam, they work exceptionally well to extract dirt and grime from the skin while still being gentle. For those of you who enjoy sporting a full beat, or apply sunscreen like your life depends on it, Kilgore mentions, "For more tenacious makeup or sunscreen, using a separate makeup remover first may be ideal."
