

Capability Statement

We Provide Children an Educational Head Start

Core Competencies

Kids Sky Rainbows is a Small Business that started in October 2014 and located in Cleveland, Ohio. We are MBE and Federal Certified.

Our products provide children a head start educational experience towards the love of learning. Our products promote young builders to explore and build with endless creativity.

Our STEM products assist children in the principles of Science, Math, Construction, and Engineering. Children learn problem solving which fosters a multitude of cognitive and physical skills such as teamwork and motor skills using puzzles, shape sorting and color matching to name a few.

This business was started because we love encouraging children to learn new skills. As their intelligence grows, they discover new worlds of possibilities.
