Commercial Auto Blender

CHEF CB1000

commercial

CHEF CB1000

Applying the automatic opening and closing function of the sound enclosure, the world's first commercial auto blender sequentially operates the automatic opening and closing of the sound enclosure and blending with just one touch of button.

5 Pre-set buttons

37 optimized recipes for cafe are stored and programmable for the pre-set buttons by user choice.

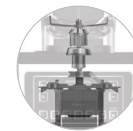

Quiet, high-performance blender

Noise reduction technology and specially designed sound enclosure is applied.

Automatic open / close function of sound enclosure

Auto open/close button provides convenient and time-saving process. Sound enclosure offers minimum-noise environment.

Commercial durable motor and blade

The durable motor performance and optimized blade structure that can be used stably for a long time, the ingredient will be blended into a soft texture.

Quick Start function

Main menu is preset on number 1 button to optimize the operating convenience.

Asymmetrical bottom container

Asymmetrical bottom design in container enables smooth and perfect blending.
