

# How to make a coral sculpture

Scribble & Sketch 

Artist: Victoria Willmott

Using basic materials found at home - newspaper, masking tape, and paints create your own coral sculpture.

## Materials

- Newspaper
- Masking tape
- Empty tape roll
- Bits of bubble wrap
- Scissors
- Cardboard toilet roll
- Paints
- Brushes.

## Instructions

**Step 1.** Have an empty tape roll ready to use as your base. Use two layers of newspaper sheets together and roll into a long sausage length.

**Step 2.** Scrunch and twist the newspaper into a curved coral tentacle. Tape the edge to the inside of the empty tape roll.

**Step 3.** Add another 3 or 4 tentacles, using the same method, roll and scrunch newspaper and tape to the inside of the roll.

**Step 4.** Cut a toilet roll tube in half to slot inside your base. This is for extra support and will allow you to add mini tentacles inside.

**Step 5.** Stuff newspaper balls to fill in any gaps on the inside so your tentacles are snug and supported.

## How to make a coral sculpture (continued)

### Instructions continued from page 1

**Step 6.** Masking tape any other wobbly areas to give it more strength and twist the tentacles as you go.

**Step 7.** Add small bits of bubble wrap to add texture to your tentacles.

**Step 8.** Choose bright colours to paint your coral, add spots or stars to bring it to life.
