# Bone Conduction MP3 Player Instruction Manual

Model: WB01

Thank you for purchase this product. Please read these instructions carefully before using this product, and save this manual for future use.

## Key Features

1. 8GB memory MP3 player supporting most of music file.
2. Water resistant IPX68 which can all the headset to be used 5 meters under water.
3. Equipped with bone conduction speakers, the headset lets you hear sounds from both the speakers and the surrounding environment.
4. with built-in FM to reach your favorite FM channels.

## What are bone conduction headphones?

1. While ordinary headphones convey sounds through the eardrums, bone conduction headphones convey sounds by conducting vibrations directly to the auditory ossicles and cochlea through the skull.
2. Since they do not cover the ears, you can enjoy music coming from the headphones and still hear sounds from the surrounding environment. This feature reduces the strain on the eardrums as compared to ordinary headphones that cover the ears.

Skull ► Auditory ossicle ► Cochlea ► Auditory nerve

## About Water Resistance

1. This product has water resistance of IPX68, which can be used up to 5 meters under water for up to 5 hours.
2. Don't use it over 5 meters deep, Don't use it when deep diving.
3. The headphone jack lid is not water resistant, water going into the jack does not affect the product as we have water resistance for inside conduction.
