 High Profile

Model : TCDD-36-2-H-R

Patented Self-Cleaning Condenser

This product is equipped with a fine mesh filter to the front of the condenser to catch dust, and a rotating brush that moves up and down daily to remove excess buildup outward and away.

≡ FEATURES & BENEFITS ≡

■ **Maintenance-free, Self-Cleaning Condenser (patented)** Only at Turbo Air

The accumulation of dust in the condenser causes the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products in refrigerators. The self-cleaning condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

■ **Attractive, elegant, glass sided Euro design**

Curved tempered front glass and minimal frame provide full product visibility to optimize display effects. Its elegant contemporary euro design and luxurious wine colored case will not only enhance any store atmosphere but also will keep product presentation at its best and beautiful.

■ **Cantilevered wired shelves adjustable up and down, tilted**

■ **304 stainless steel floor and airflow grille**

■ **High-density polyurethane insulation**

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.

■ **Easy access control panel**

■ **Sliding rear doors for product loading & unloading**

■ **Heavy duty, white PE coated wire shelves**

■ **Environmentally friendly, efficient refrigeration system**

Turbo Air's refrigerators are designed with oversized and balanced environmentally friendly R-134A (CFC Free) refrigeration. These include large evaporators and condensers for faster cooling and balanced temperature throughout the cabinet.

■ **Safety shielded LED lighting interior**

■ **Rear access of compressor compartment for quick and easy service**

■ **Refrigerated case holds avg. 33°F ~ 41°F for fresher products**
