

Heavy-Duty Commercial Microwave Ovens

BUILT FOR THE DEMANDS OF THE TOUGHEST KITCHEN

Cook It Fast, Cook It Right

Heavy-duty microwave ovens from Sharp are built for volume use and speed cooking. Designed for busy kitchens where speed and efficiency are essential, stackability brings added convenience, while rugged construction equals exceptional value that's built to last. The Heavy-Duty series offers a range of wattage output to avoid purchasing units that are over or underpowered. This allows kitchens to be outfitted to specific cooking needs and ultimately keeps electricity costs down.

These heavy-duty commercial microwaves are packed with features: For starters, the large (0.7 cubic foot) interior can easily accommodate a half-sized steam table pan with plenty of room for proper handling. Four power output capabilities (standard on all Sharp heavy-duty ovens) enable customization and optimal cooking time. Plus, durable latch handles, the ability to stack two units, high-quality stainless steel interiors and exteriors, and more. Other features include:

- **Memory** – stores up to 20 program inputs; recalls the memories at any time to confirm power level and time setting
- **3-Stage Programming** – program food to defrost then begin cooking at one power level and finish cooking at another.
- **SelectaPower™** – 11 variable power levels for more precise control
- **SelectaTime™** enables manual time input
- **Select from 2 audible tones** that signal the end of the cooking cycle, or switch off for silent operation
- **Double Quantity Button** automatically adjusts time for a double portion
- **Express Defrost™** automatically divides total defrosting time into 3 stages with 3 power levels
- **Counter Check** feature keeps tabs on oven usage, tallying how often each button is used and the number of manual inputs
- **Lighted Digital Display** shows time setting and countdown that is easy to read
