

Tuff-Cut® Cutting Boards

BENEFITS

**DESIGNED TO WITHSTAND
TEMPERATURES UP TO 350°F**

**IDEAL FOR USE
AS PIZZA PEEL OR MEAT CARVING**

Some cutting boards just can't take the heat. Where other boards warp or melt, the Tuff-Cut gets the job done.

The strong material of San Jamar's Tuff-Cut Cutting Boards resist unsanitary cut grooving and come in several sizes, including custom designs for slicing and serving. They are perfect for high-temperature use. Unlike regular cutting boards, the ½" thick resin enables this cutting board to withstand temperatures of up to 350°F without scorching or warping. Perfect for meat carving, or for use as a pizza peel (custom cut option), the Tuff-Cut can handle the heat. The combination of form and function makes this one a cut above.
