# Content-based Instructional Strategies for ELL

## Content-based Instructional Strategies for ELL

### 45 Hours or 3 Graduate Credits

#### Course Description:

This course focuses on effective content-based instructional strategies for English language learners (ELL). Learn how to balance the dual focus on language and subject matter, and also learn a helpful framework for designing content-based classes and lessons. Examine different criteria for choosing and developing the content to teach, as well as factors influencing the choice, development, and adaptation of materials. Learn several useful activity types and how to integrate listening, speaking, reading, and writing in content-based instruction with students at different proficiency levels. Explore and learn how to implement technological resources available for developing content-based curricula, and understand how assessment is affected by the use of content-based instruction.

#### Course Objectives: Participants will

- Apply the “Six-T’s Approach” to developing their own content-based lessons. Originally proposed by Stoller and Grabe (1997), the Six T’s provides a useful framework for designing content-based courses.
- Integrate the four skills and language components in content-based instruction and develop a content-based unit that includes prototypical activities in order to create an integrated-skills focus.
- Work with students at various proficiency levels, using techniques related to using content-based instruction with (literate) beginners, false beginners, intermediate, and advanced language learners.
- Incorporate numerous technological resources that can be used in content-based instruction. These include Internet resources, such as websites that give information about language learning and teaching, as well as those that provide subject matter information.
- Assess issues in content-based instruction and assess learners’ language skills and content knowledge with the main purposes of language testing and criteria used to evaluate language measures. They should also be able to explain the role alternative and authentic assessment play in language testing and content-based instruction.

#### Student Expectations:

This online course is experiential and interactive. Participants will engage in a variety of activities to learn, practice, and apply the skills outlined in the course. This will include reflective journal exercises, short answers that are reviewed by a moderator, quizzes, and observation

and analysis of lessons. A final exam is also a part of the course. Participation in all of these areas is necessary for students to successfully complete the course with a passing grade.

**Grading:**

- **Forum Post Exercises/ Reflective Journals:** 70% of your final grade
- **Quizzes:** 10% of your final grade. Quizzes may be submitted up to 3 times each and the highest score of the 3 will be used.
- **Final Exam:** 20% of your final grade. **You must receive a score of 60% or greater on the final exam to pass this course.**
- You must have an 80% average to obtain university credit for any course. You must have an 80% average to pass the course unless your district has specified otherwise. If your district has specified a different percentage needed to pass, it will be posted in “Your District Information” in the District section of the site. If nothing is posted, you must pass with an overall average of 80%.
- Forum post exercises will not be approved until your entry has met the minimum approval score of 80%.

**Credit:**

- For those taking this course for credit, upon completion, the necessary paperwork will be submitted to the university that was selected at the time of purchase. Please see [University Partners](#) on our homepage for more information.
- For those taking this course for a Certificate of Completion, one will be emailed upon successful completion that may kept for your records.
