# AEGIS Neonate Medical Wrap

AEGIS ( The Seatbelt of Maternity ) crash tested, award winning neonate transport system, is the solution for safe couplet-care transports to minimize risk. AEGIS provides upright, hands-free, skin to skin proximity for optimal assessment & monitoring throughout transport. Transporting together enhances optimal physiological outcomes, alleviates the need of an additional food source, heat source and ambulance.

**A baby delivery is one of the most memorable calls you will get, Choose AEGIS.**

## Features & Benefits

- Decrease mother & newborn stress.
- Newborns face is visible to assess & monitor.
- Nano-guard supports newborn's head & neck.
- Properly positioned Skin to Skin per AAP guidelines.
- 4-way stretch material harnesses entire newborn baby & absorbs energy from impact.
- Patient use on or off the gurney, in or out of the ambulance.
- Quick & easy assembly, wearability & storage.
- Allows tubes/lines to pass through top or bottom easily
- Open bottom to allow umbilical cord & placenta to remain intact during transport
- X-Static knitted throughout for antimicrobial benefits.
- X-Static & Skin to Skin reduce the risk of hypothermia.
- Skin to Skin / Oxytocin reduce the risk of hemorrhage.
- Option to wash & re-use or single patient use.

# ABEO

Seatbelt attachment

## ONLY pregnancy seatbelt for ambulance use.

- One size fits all
- Made of Biothane, Reusable, wipe clean, easy to store.
- The H-harness design reduces the risk of fetal distress & risk of abruption.
- Passed frontal, rear & side crash testing at Calspan.
- *ABEO must be used in combination with AEGIS to transport mom/baby in the ambulance.*

If your ambulance stocks an O.B. kit  
to deliver a baby,  
We recommend,  
you also have  
AEGIS & ABEO  
to safely transport  
a baby.
