

# BASE12

WORK BETTER + LIVE SMARTER

Portable sunshade for up to 15" laptops and other devices.

PRODUCT MANUAL

# WORK BETTER + LIVE SMARTER

## FEATURES

- Designed for cell phones, tablets and laptops up to 15 inches.
- Side and back openings for routing cords and cables.
- Anti-skid padding on the base.
- Pullover head cover for extreme conditions and extra privacy.

## USAGE

- Ideal for outdoor working. To block glare from sunlight, set the shade up so that the direction of the sunlight is not towards the opening.
- Perfect for on location photography or astrophotography.
- Can be used for privacy and security.
- Not to be used for wet weather conditions.

## TO OPEN:

1. Begin by pulling the shade from the attached mesh enclosure, the shade will automatically spring open. Place your laptop inside. Cords and cables can be routed through the opening at the sides. Small items can be placed on the inner mesh pockets while you are working.

2. For additional darkness the material sheet enclosed can be attached to the velcro strip at the top of the shade.

3. The top of the BASE12 shade can be temporarily lowered by attaching the velcro loop to the underside of the shade where the velcro receiving strip is. This helps to provide additional protection.

## TO CLOSE:

1. Hold the shade with the opening facing towards you and the texture grip base pointing upwards, grab each side of the shade where the thumb marks are indicated and in the direction of the thumb marks. Rest the top of the shade on a surface before you take the next step.

2. Cross your right hand under as your left hand goes over.

3. Continue moving your hands downward and the base of the shade should fold in making a circular shape.

4. When the shade is flat, fold the mesh over the top to contain and secure the shade in its original folded down disc shape.

Please scan the QR code for step by step video instructions on how to open and close the stand.
