

Characteristics & Care Fauxwood ABS Plastic

Material Characteristics

Designed for Long-Term Heavy-Duty Applications

The combination of copolymers (Acrylonitrile, Butadiene, and Styrene) gives ABS an excellent combination of strength, rigidity, and toughness. The fauxwood finish is ARVINYL laminate created from a semi-rigid film.

ABS is chemical and stress-crack resistant. It is tough, dimensionally stable, and will hold up to long-term use. To ensure product longevity, fauxwood products should not be mounted in very hot or cold areas.

Our fauxwood material is engineered to have a natural grain appearance both in Cherry and Maple finishes. The two color choices provide a visually appealing, upscale option to any area.

Care and Cleaning

BOWMAN® *Signature Series* products can be cleaned with standard hospital cleaning products. Petroleum-based oils, solvents, and paints should not be used.

Standard hospital cleaning supplies can be used.
