How to Install the Battery

Warning: Do not plug in the brailler until the battery has been installed. To avoid risk of personal injury, do not install the battery if it is damaged.

1. Locate battery door on bottom, unscrew the two screws and remove door.

2. Connect battery power plug in the right corner of the battery compartment. The plug fits into the port in only one way.

3. Once connected, place the battery in the compartment and hold in place.

4. Close the battery cover, first inserting the tabs into the slots on the right. Screw the two screws back in place.

5. Locate power adapter in box and plug adapter into wall power socket.

6. Plug adaptor cord into its port at the left rear side of brailler.

7. Turn on the brailler using the switch on the lower right side. Listen for the beep.

8. Wait 25 seconds for the software to load. When you hear "Welcome" you are in the Welcome Menu.

Fully charging the battery should take no longer than 8 hours. You can use the SMARTBrailer™ while it is charging. When charging is complete, the charging icon on the screen will go away.
