## BLADE REMOVAL & CLEANING

For optimal performance and life, the **BLADE** and the **BED BAR** must be removed then cleaned every few hours of operation.

Installation is reverse order of removal

**Cleaning:** For optimal performance and life, the components must be cleaned every 2 to 3 days of use.

Clean with pressure-washer at 1500-2000 PSI. Hot water, fan spray settings.

Run the Gladiator for 15 minutes after washing. Allowing components to dry.

Clean the length of the Cutting Reel and Shroud of all debris.

**WARNING**  
Avoid direct water contact on motor!

**WARNING**  
Avoid direct water contact on bearings
