

TWISTER T6 TRIMMER CLEANING

Recommended Cleaning Solutions:

- Simple Green Industrial cleaner
- Rubbing Alcohol 99%

Recommended Cleaning Intervals:

- Twister T6 Trimmer - Every 3 hours of use
- Twister T6 Leaf Collector- Every 8 hours of use

Recommended Cleaning Methods:

- Twister T6 Trimmer - Remove control box, then hand clean machine only
- Twister T6 Leaf Collector Vacuum - Hand Clean

Cleaning Instructions:

Twister T6 Trimmer

1. The quickest way to clean the machine is to wash by hand. **Pressure washing is NOT recommended.**
2. Remove control box and hand clean. **DO NOT get control box wet.** It is not water tight. If using isopropyl, avoid getting it on the rubber non-skid feet. This will dry it out causing the rubber to flake.
3. Remove lid, tumbler, belt cover, chute, reel blade & bed knife and hand clean. **DO NOT soak reel blade or bed knife assembly.** You can clean most other parts by soaking in hot water and Simple Green, then rinse. For plastic parts, use only non-abrasive scrubbing pads.
5. Spray the entire machine with Simple Green and let sit for 5-10 minutes, rinse thoroughly.
6. Use compressed air to dry machine. Allow machine to completely dry before storing.

Twister T6 Leaf Collector

DO NOT pressure wash vacuum as the motor is not water tight.

1. Remove inlet cover.
2. Remove impeller (you will need a Pulley Puller 25-0009) and soak in hot water and Simple Green
3. Clean inside the impeller housing using Simple Green
4. Soak Vacuum bag in hot water and Simple Green and rinse.
