WEEBILL LAB Camera Compatible List

Updated on October 30, 2019 (corresponding to the firmware version of stabilizer: 01.07, image transmission firmware version: 01.12)
The camera models listed in the table are not complete, but have been tested on the WEEBILL LAB and achieve the stabilization control and other functions.
If the camera model you need is not listed, please contact us to check the "camera model compatibility" and we will improve it and update it in time.

Brand	Model	Compatible Camera Control Cable	Grip Control	AAP Control	Image Transmission Transmission or not	Camera Menu Settings	Firmware Update Recommended Version	Compatible Lens

Note 1: The form will be updated in real time. Please pay attention to the update.
2. Feature adjustment is shown in the above table.
3. Some models that are not listed in the table will be adapted in the future according to market feedback.

Attached Table:
1. Can be balanced at any focal length/ means the balance adjustment can be achieved for the both ends of the zoom lens.
2. The camera model with "*" in the table means that the camera can be controlled by the WEEBILL LAB, but the camera model with the follow focus the installation mode is not flush and you can not to fix yourself.
3. The camera model with "**" in the table means that the camera can be controlled by the WEEBILL LAB, but the camera model with the follow focus the installation mode is not flush.

Camera Brand	Camera Model	Lens Type	Installation	Balance Adjustment	Need a Camera Backing Rose or not	Balance Adjustment with Camera Only	Follow Focus Motor Installation	Remark
