

Option A

DISINFECTANT MAT CONTAINMENT SYSTEM

apache
mills™

24" x 32"

Sanitizing Finger-Tip ½" Rubber Mat

Rubber brushing finger-tips physically remove dirt and debris from the soles of shoes. Simultaneously upon impact with the mat, gravitational force causes the antimicrobial solution in the reservoir of the mat to be applied to the soles of shoes and boots. When used with an antimicrobial solution¹ approved for use in this manner, the mat will provide maximum protection against (or will inhibit or mitigate the growth or development of) microbiological organisms that may be present and tracked in on the soles of shoes and boots or sanitizes/disinfects the surfaces of the soles of shoes and boots¹. This dual combination is designed to effectively maintain a clean workplace environment.

- Chemically resistant to common disinfectant solutions
- ½" (13mm) Thickness
- 1-gallon (3.8 liters) capacity of containment mat system
- Ideal for food processing as well as other work environments seeking methods to remove contaminants from foot traffic
- It is recommended that an individual spends at least 60 seconds atop of mat to achieve its full effect

A HEALTHY BUSINESS STARTS AT THE DOOR

¹Only USEPA approved antimicrobial chemicals are recommended to be used with this product
