

TRANSFORMERS MADE EASY

To work out the correct transformer for your LED display, simply select your configuration from the layout [see below image]. Multiply the wattage figure by the number of drops, add the wattage of your HEADER PANEL [if applicable].

Up to 50watts total - select TF60DC or a cable & transformer pack ending - 60watts

UP to 80watts total - select TF100DC or a cable & transformer pack ending - 90watts

Over 80watts total - select TF120DC or a cable & transformer pack ending - 120watts
